Heavy Ion Collisions

NOW COMPLETE!

edited by R. BOCK, *Gesellschaft für Schwerionenforschung, Darmstadt, West Germany*

The increasing number and variety of heavy ion accelerators have produced a wealth of new information during the last ten years. Nevertheless, a comprehensive presentation of the field has been lacking. It is the aim of this book to fill this gap. Experts, actively working in research, were asked to provide well-balanced and not-too-specialised views which concentrate on essential results and on the underlying concepts of their respective fields.

Heavy Ion Collisions covers in three volumes, a substantial amount of heavy ion physics. **Volume I** is devoted mainly to *microscopic* aspects of heavy ion reactions, with chapters on elastic and inelastic scattering, transfer reactions, nuclear cluster correlations and resonance phenomena. In addition, this volume includes a contribution on relativistic heavy ion collisions, taking into account the latest developments in the field.

Volume II deals with the *macroscopic* aspects of heavy ion reactions, i.e. complete and incomplete fusion, deep-inelastic processes and their theoretical interpretations.

Volume III includes contributions on γ-ray spectroscopy, hyperfine interactions and selected aspects of heavy ion atomic physics.

Focussing on essential results and on the underlying concepts and ideas, the three volumes of **Heavy Ion Collisions** will be of paramount value to graduate students entering the field and to specialists of research.

Volume 1

1979 viii + 676 pages
Price: US $110.75/Dfl. 260.00
ISBN 0-7204-0738-9

CONTENTS: Preface. Elastic and inelastic heavy ion scattering *(A. Richter and C. Toepffer).* Heavy ion transfer reactions *(L. B. J. Goldfarb and W. Von Oertzen).* Nuclear cluster correlation *(A. Arima).* Energy dependent structure in heavy ion interactions *(A. Gobbi and D. A. Bromley).* Nuclear reactions between relativistic heavy ions *(R. Stock).* Subject index.

Volume II

1980 viii + 472 pages
Price: US $93.50/Dfl. 220.00
ISBN 0-444-85295-6

CONTENTS: Preface. Basic concepts in the description of collisions between heavy nuclei *(W. Nörenberg).* Results of deep interactions between complex nuclei - complete and incomplete fusion *(M. Lefort).* Dissipative collisions *(A. Gobbi and W. Nörenberg).* Fusion and fission of heavy nuclei *(U. Mosel).* Statistical theory of heavy ion reactions *(H. H. Deubler, K. Dietrich and H. Hofmann).* Theory of fragmentation in fission, fusion and heavy ion scattering *(J. A. Maruhn, W. Greiner and W. Scheid).* Subject index.

Volume III

1982 x + 666 pages
Price: US $132.00/Dfl. 310.00
ISBN 0-444-85352-9

CONTENTS: Preface. *Chapters:* 1. In-beam gamma-ray spectroscopy with heavy ions *(D. Pelte and D. Schwalm).* 2. Heavy-ion atomic physics *(W. Greiner and W. Scheid).* 3. Hyperfine interactions in isolated ions *(G. Goldring).* 4. Probing nuclei far from stability with heavy ions *(J. H. Hamilton).* Subject Index.

SUBJECT INDEX VOLUMES 181–190

Accelerators, Beam Handling and Targets

Proceedings of the 5th Tandem Conference
Catania, Italy, June 9–12, 1980

Part I. New European projects

The present status of the Daresbury nuclear structure facility, R.G.P. Voss **184** (1981) 1
Initial commissioning progress on the Daresbury 30 MV tandem, T.W. Aitken **184** (1981) 5
The Oxford folded tandem, P.J.S.B. Barratt, T.R. Brock, G. Doucas, T.J.L. Greenway, A. Henwood, A.R. Holmes, H.R.McK. Hyder, A.B. Knox, G.M. Parker and J. Takacs **184** (1981) 9
On the 16 MV XTU tandem of the Laboratori Nazionali di Legnaro, R.A. Ricci and C. Signorini **184** (1981) 35
Column and laddertron tests at the XTU tandem of the Laboratori Nazionale di Legnaro, F. Cervellera and C. Signorini **184** (1981) 49
Status report of the Laboratorio Nazionale del Sud, E. Migneco **184** (1981) 55

Part II. Reports from European Laboratories

Strasbourg MP 10 – report, J.C. Oberlin, M. Letournel and G. Heng **184** (1981) 61
Up-grading of the Strasbourg MP 10, M. Letournel, J.C. Oberlin and G. Heng **184** (1981) 67
Use of a laddertron chain in Orsay MP tandem, P. Bretonneau, M. Dumail and B. Waast **184** (1981) 73
Some improvements of the Pelletron accelerator in Lund, R. Hellborg and K. Håkansson **184** (1981) 79
Improved performance of the Munich MP tandem: a status report, H. Münzer, L. Rohrer and S.J. Skorka . . **184** (1981) 87
Recent experiences with the improved EGP-10-1 tandem at Rossendorf, H. Matthes **184** (1981) 93
Recent activities at the CISE tandem, E. Caruso and F. Cristofori **184** (1981) 97
Rebuilding of the Bucharest FN tandem after the earthquake of March 1977, S. Dobrescu **184** (1981) 103

Part III. Non-European laboratories

Progress on the 20UR pelletron at the Japan Atomic Energy Research Institute, G.A. Norton, M.L. Sundquist, R.E. Daniel and R.D. Rathmell **184** (1981) 107
The 12 UD pelletron accelerator at the University of Tsukuba, S. Seki, K. Furuno, T. Ishihara, Y. Nagashima, M. Yamanouchi, T. Aoki, T. Mikumo and J. Sanada **184** (1981) 113
The North American MP tandem accelerators, P. Thieberger, H.E. Wegner, M. McKeown, R. Lindgren, N. Burn, J.H. Broadhurst, T.S. Lund, T.E. Miller, K. Sato, C.E.L. Gingell, T.A. Barker, P.D. Parker and D.A. Bromley **184** (1981) 121
The 25 MV tandem acclerator at Oak Ridge, C.M. Jones **184** (1981) 145
Improved performance of the São Paulo Pelletron, O. Sala, M. Stier and J.C. Acquadro **184** (1981) 153
The IAE Peking HI-13 tandem accelerator, Ju Jue-xian **184** (1981) 157
The Argentine 20 MV tandem accelerator project, E. Perez-Ferreira, M.A.J. Mariscotti, E. Ventura, A. Ceballos, N. Fazzini, A. Filevich, H. González, R. Requejo, R. Ribarich, J.J. Rossi, E. Acterberg, D. Camin, J. Nicolai and S. Tau **184** (1981) 161

Part IV. Ion sources and beams

Polarized heavy ion beams at tandem accelerators, E. Steffens **184** (1981) 173
Intense low energy heavy ion beams from a tandem Dynamitron, K. Brand **184** (1981) 187
The picosecond bunching system at the Munich MP tandem accelerator, W. Wagner, R. Zierl, P. Kienle, H.J. Körner, K.E. Rehm, P. Sperr and L. Rohrer **184** (1981) 195
An automated beam-scanner system, R. Stensgaard and T. Korsbjerg **184** (1981) 197

0167/5087/83/0000–0000/$03.00 © 1983 North-Holland

Part V. Strippers

A review of the performance and physical characteristics of carbon stripper foils made by the glow discharge process, N.R.S. TAIT **184** (1981) 203
Tests of specially treated carbon stripper foils under heavy ion bombardment, E. RANZINGER, P. MAIER-KOMOR, H.J. MAIER and H. MÜNZER **184** (1981) 211
Investigations on carbon stripper foils produced in a dc glow discharge, B. HUCK, E. JAESCHKE, W. KRÄTSCHMER, R. REPNOW and H. WIRTH **184** (1981) 215

Part VI. Post-accelerators

Superconducting cyclotron in Strasbourg, G. FRICK (for the accelerator study group) **184** (1981) 223
Guidelines for the Orsay MP tandem post-accelerator project, M. LANGEVIN **184** (1981) 227
The proposed tandem injector for the VICKSI facility, W. BUSSE, B. MARTIN, R. MICHAELSEN, W. PELZER, D. RENNER, B. SPELLMEYER and K. ZIEGLER **184** (1981) 229
The Argonne tandem as injector to a superconducting linac, J.L. YNTEMA, P.K. DEN HARTOG, W. HENNING and W. KUTSCHERA **184** (1981) 233
Florida State University superconducting booster, K.R. CHAPMAN **184** (1981) 239

Part VII. Applications, theory and computer control

Accelerator mass spectrometry and radioisotope detection at the Argonne FN tandem facility, W. HENNING, W. KUTSCHERA, M. PAUL, R.K. SMITHER, E.J. STEPHENSON and J.L. YNTEMA **184** (1981) 247
The basic laws of the statistical weak beam dynamics and the transport theory of the higher-order envelope matrix, CAO QING-XI **184** (1981) 269
The VICKSI computer control system, concept and operating experience, W. BUSSE, H. KLUGE and K. ZIEGLER **184** (1981) 275
The computer monitor and control system for the Munich MP tandem-accelerator, H. MÖRCHEN, J. OFF, L. ROHRER and H. SCHNITTER **184** (1981) 281

The energy compressor at the Glasgow 170 MeV electron linac, W.A. GILLESPIE and M.G. KELLIHER **184** (1981) 285
MINIMAFIOS – nouvelle source d'ions fournissant des faisceaux d'ions lourds fortement multichargés, R. GELLER and B. JACQUOT **184** (1981) 293
Compensated linac beam colliding with a stored beam, P.L. CSONKA **184** (1981) 297
The extraction system for the K-500 cyclotron at M.S.U., E. FABRICI, D. JOHNSON and F.G. RESMINI **184** (1981) 301
Beam emittance measurements of magnetron type negative ion source (*Letter to the Editor*), Y. WAKUTA, K. MATSUO and A. NAGAO **184** (1981) 583
Circular hole iron septum magnet (*Letter to the Editor*), H. Noma, T. Shioda and Y. YOSHIZAWA **184** (1981) 587
An apparatus for measuring the beam emittance of the Tohoku AVF cyclotron, K. ISHII, M. FUJIOKA, H. ORIHARA, T. SHINOZUKA, K. SERA, S. MORITA, M. MARUYAMA and Y. TSUJI **185** (1981) 1
The mass separation and collection of ions having large angular and energy spreads emitted from pulsed plasma sources, Y. PAISS and M. ORON **185** (1981) 7
Beam optical properties of the magnetic field produced by two coaxial coils, D.E. LOBB **185** (1981) 13
Improvement of gas efficiency of negative ion sources, J.H. WHEALTON **185** (1981) 25
Production of optically thin free-standing oil films from the edge of a rotating disc, J.G. CRAMER, D.F. BURCH, R. RODENBERG and P.B. CRAMER **185** (1981) 29
New method for the production of polarized ^{3}He ions based on the 2^3S_1 state of ^{3}He (*Letter to the Editor*), R.J. SLOBODRIAN **185** (1981) 581
On the cleaning of heavy-ion source anodes (*Letter to the Editor*) R.C. ROGERS **185** (1981) 585
The transmission-line multiplier high voltage generator, G. BRAUTTI and A. RAINÒ **186** (1981) 499
The uniformity of carbon stripper foils, C.J. SOFIELD, L.B. BRIDWELL, N.E.B. COWERN, N.R.S. TAIT and D.W.L. TOLFREE **186** (1981) 505
Production of intense beams of polarized negative hydrogen ions by the atomic beam method (*Letter to the Editor*), P.A. SCHMELZBACH, W. GRÜEBLER, V. KÖNIG and B. JENNY **186** (1981) 655
Evaluation of thin metal foils as targets and windows for heavy-ion experiments (*Letter to the Editor*), J.D. MOLITORIS and J.M. NITSCHKE **186** (1981) 659

Proceedings of the 1st Conference on Charged Particle Optics
Giessen, Fed. Rep. Germany, September 8–11, 1980

Part I. High energy particle spectrographs

Broad-range particle spectrographs, H.A. Enge **187** (1981) 1
Particle spectrographs free of kinematic effects, H. Ikegami **187** (1981) 13
JAERI magnetic spectrograph for heavy-ion research, Y. Sugiyama, N. Shikazono, H. Ikezoe and H. Ikegami **187** (1981) 25
Optimization of induced aberrations in ion-optical systems, L.H. Harwood, J.A. Nolen, Jr. and K.L. Brown . **187** (1981) 37
Calculation of a dipole magnet for the velocity filter SHIP and computer simulation of fusion experiments, B. Thuma, H. Ewald, G. Münzenberg, S. Hofmann and F.P. Hessberger **187** (1981) 45

Part II. Beam guidance systems

Beam envelope matching for beam guidance systems, K.L. Brown **187** (1981) 51
Chromatic correction schemes for large circular machines, R.V. Servranckx **187** (1981) 67
Measurements of second order image aberrations of a sector magnet, G. Moritz, U. Czok and H. Wollnik . . . **187** (1981) 75
A new compact doubly achromatic asymmetric two-magnet beam deflection system, R.M. Hutcheon and E.A. Heighway **187** (1981) 81
TRANSOPTR – a second order beam transport design code with optimization and constraints, E.A. Heighway and R.M. Hutcheon **187** (1981) 89
High energy charged particle optics computer programs, D.C. Carey **187** (1981) 97
Beam optics and magnet technology of the microtron in Mainz, H. Herminghaus, K.H. Kaiser and U. Ludwig **187** (1981) 103
Physical and optical properties of rare earth cobalt magnets, K. Halbach **187** (1981) 109
Variable strength focussing with permanent magnet quadrupoles, R.L. Gluckstern and R.F. Holsinger **187** (1981) 119

Part III. Mass spectrometers and separators

Mass spectrometers of high transmission and high resolving power, H. Matsuda **187** (1981) 127
Ion optics of a tandom mass spectrometer with variable dispersion and simultaneous detection: second stage, G.J. Louter, M.M.J. Lens and A.J.H. Boerboom **187** (1981) 137
Beam optics in secondary ion mass spectrometry, H. Liebl **187** (1981) 143
A new look at time-of-flight mass spectrometers, M. Baril **187** (1981) 153
Ion optics of isotope separators, J. Camplan **187** (1981) 157
Isotope separators with variable resolving power, K. Becker and H. Wollnik **187** (1981) 167

Part IV. Electron microscopy

Electron microscopy and charged particle optics, E. Zeitler **187** (1981) 171
Numerical design of electron lenses, E. Kasper **187** (1981) 175
Aberration studies and computer algebra, P.W. Hawkes **187** (1981) 181
Correction of aperture aberrations in magnetic systems with threefold symmetry, H. Rose **187** (1981) 187
An improved finite element method for calculating the magnetic field distribution in magnet electron lenses and electromagnets, T. Mulvey and H. Nasr **187** (1981) 201
Magnetic electron lenses for high voltage microscopes, J.L. Balladore, R. Murillo, P.W. Hawkes, J. Trinquier and B. Jouffrey **187** (1981) 209
Image aberrations of axially symmetric imaging systems with off-axial rays: three-dimensionally imaging electron microscopes (part III), D. Typke **187** (1981) 217
Calculation of electrostatic multitubular core-lenses for a 3D imaging electron microscope: three-dimensionally imaging electron microscopes (part IV), E. Plies **187** (1981) 227
Definition of a corrected magnetic prism spectrometer for electron microscopy, J.-P. Perez, J. Sevely and B. Jouffrey **187** (1981) 237

Part V. Electron and ion sources

Electron guns, state of the art, J.B. Le Poole **187** (1981) 241
Numerical design of electron guns and space charge limited transport systems, W.B. Herrmannsfeldt **187** (1981) 245
Two electron guns with adjustable beam compression and perveance, R. Becker **187** (1981) 255
The design of electron guns including thermal effects, W. Sinz **187** (1981) 259

A computer program to solve the Laplace equation in three dimensions using a powerful boundary input method, R. JÜRGENS ... **187** (1981) 263
A guard ring for a field emission gun, M. DENIZART, F. SONIER, J. TRINQUIER and B. JOUFFREY ... **187** (1981) 267

Part VI. Optics of intense ion beams

Emittance limitations in heavy ion fusion, R.L. MARTIN ... **187** (1981) 271
Emittance growth of ion beams with space charge, I. HOFMANN ... **187** (1981) 281
Pulselac program: space charge neutralized ion beams for intertial fusion applications, S. HUMPHRIES, JR., R.J.M. ANDERSON, J.R. FREEMAN, T.R. LOCKNER, J.W. POUKEY and J.J. RAMIREZ ... **187** (1981) 289
Problems in the focusing of intense heavy ion beams, E. COLTON ... **187** (1981) 295
Space charge effects in the focusing of intense ion beams, I. BOZSIK and I. HOFMANN ... **187** (1981) 305

Physics of the high current density electron beam ion source (EBIS), M.C. VELLA ... **187** (1981) 313
Beam phase stabilisation at the SIN injector cyclotron, P.K. SIGG ... **187** (1981) 323
Non-linear coupling from the beam–beam force in electron–positron storage rings, B.W. MONTAGUE ... **187** (1981) 335
A 100 picosecond post-acceleration bunching system at the Studsvik 6 MV Van de graaf accelerator, N. OLSSON ... **187** (1981) 341
A stand-alone beam steering and profile monitor, D.G. MCSHURLEY, G. OXOBY, S. SHAPIRO, Q. TRANG and S. WILLIAMS ... **187** (1981) 347
Experimental observation of radiation loss of a single bunch electron beam in a linear accelerator, S. TAKEDA, M. KAWANISHI, K. HAYASHI and H. SAKURAI ... **188** (1981) 1
Nonlinear coherent effects between two strong bunched beams colliding in a storage ring, E. KEIL ... **188** (1981) 9
The neutron time-of-flight facility at Tohoku University cyclotron, H. ORIHARA and T. MURAKAMI ... **188** (1981) 15
A polarized proton target for measurements in intense photon beams, V.A. GET'MAN, A.YA. DERKACH, I.M. KARNAUKHOV, A.A. LUKHANIN, V.D. ORLOV, A.A. RAZUMNYJ, P.V. SOROKIN and E.A. SPOROV ... **188** (1981) 25
Amplitude growth of (anti)proton colliding beams, M. CONTE ... **188** (1981) 269
Spark channel characteristics of a large Van de Graaff generator, J.A. STANIFORTH and T.R. CHARLESWORTH ... **188** (1981) 483
A fast, low-mass detector for charged particles, J.A. MCGILL, L.G. ATENCIO and C.L. MORRIS ... **188** (1981) 491
A multiwire proportional counter beam scanner, H.V.D. GRAAF, J. DIRKER, C.W.E. VAN EIJK and W. LOURENS ... **188** (1981) 495
First results on elliptically shaped cavities (*Letter to the Editor*), P. KNEISL, R. VINCON and J. HALBRITTER ... **188** (1981) 669
A liquid ^{3}He target system for use at intermediate energies, D.K. HASSELL, R. ABEGG, B.T. MURDOCH, W.T.H. VAN OERS, H. POSTMA and J. SOUKUP ... **189** (1981) 341
Ion source–uranium target system for the Buenos Aires ISOL facility, H. HUCK, J. ORECCHIA, M.L. PÉREZ, J.J. ROSSI, A. TERSIGNI and J. VIDALLÉ ... **189** (1981) 347
A surface ionization source for beam energy calibration, P. DYER and R.G.H. ROBERTSON ... **189** (1981) 351
A versatile dual grid-type beam scanner, C. ALAIME, L. BONNET, PH. DESCHEPPER, L. PALFFY and P. PELLEGRIN ... **189** (1981) 357
First order transfer matrices for relativistically fast particles in magnetic and electric sector fields and quadrupoles, H. WOLLNIK and H. MATSUDA ... **189** (1981) 361
Why a second-order magnetic optical achromat works, D.C. CAREY ... **189** (1981) 365
High speed magnetic field measurement of a large spectrometer magnet, M. SAKUDA, K. NAKAJIMA, A. DE LESQUEN, N. KIM, A. MASAIKE, K. OGAWA, M. SUETAKE, F. TAKASAKI and Y. WATASE ... **189** (1981) 369
Thermal neutron flux in an electron synchrotron room, T. KOSAKO and T. NAKAMURA ... **189** (1981) 377
Device for precise measurement of charged particle beam intensity, M.N. VARMA and J.W. BAUM ... **190** (1981) 1
Study of a superconducting 2.5 GeV proton cyclotron as a first step towards a kaon factory, W. SCHOTT, E. ZECH and W. WILHELM ... **190** (1981) 217
Measurements and analyses of the inhomogeneities of magnetic fields along a radial direction in a sectorial electomagnet, Y. ŌKUMA, K. YAGI, I. KUMABE and K. MATSUDA ... **190** (1981) 225
The Texas A&M cyclotron polarized ion facility, E.P. CHAMBERLIN and R.A. KENEFICK ... **190** (1981) 441
A facility for neutron polarization measurements and methods for the analysis of polarization data, F.N. RAD, R.G. GRAVES, D.P. SAYLOR, M.L. EVANS, E.P. CHAMBERLIN, J.W. WATSON and L.C. NORTHCLIFFE ... **190** (1981) 459
The optimisation and efficiency of antiproton production within a fixed acceptance, T.A. VSEVOLOZSKAYA ... **190** (1981) 479

Instruments and Methods for High Energy Physics

The TASSO gas and aerogel Cherenkov counters, H. BURKHARDT, P. KOEHLER, R. RIETHMÜLLER, B.H. WIIK, R. FOHRMANN, J. FRANZKE, H. KRASEMANN, R. MASCHUW, G. POELZ, J. REICHARDT, J. RINGEL, O. RÖMER, R. RÜSCH, P. SCHMÜSER, R. VAN STAA, J. FREEMAN, P. LECOMTE, T. MEYER, S.L. WU and G. ZOBERNIG ... **184** (1981) 319
Disruption limits for linear colliders, R. HOLLEBEEK ... **184** (1981) 333

Proton beam profile measurements with synchrotron light, R. Bossart, J. Bosser, L. Burnod, E. d'Amico, G. Ferioli, J. Mann and F. Méot . . . **184** (1981) 349
A scintillation counter used in a vacuum chamber for a liquid hydrogen target, H. Aihara, H. Fujii, T. Kamae, K. Nakamura and T. Sumiyoshi . . . **184** (1981) 359
An experimental ensemble used for the study of proton–proton scattering at SIN, D. Besset, Q.H. Do, B. Favier, L.G. Greeniaus, E. heer, R. Hess, C. Lechanoine-Leluc, D. Rapin, D.W. Werren, M. Daum, S. Mango, E. Steiner, G. Vecsey and Ch. Weddigen . . . **184** (1981) 365
Performance of a scintillator glass shower detector for 20–120 MeV electrons, M. Kobayashi, Y. Yoshimura, M. Chiba, J. Iwahori and H. Yoshida . . . **184** (1981) 399
The microchannel plate as vertex detector in high energy physics experiments, D.M. Potter . . . **184** (1981) 405
Measurement of secondary neutron fluxes around beam stop for 500 meV protons, S. Ban, H. Hirayama and K. Katoh . . . **184** (1981) 409
Charged-coupled devices for particle detection with high spatial resolution, C.J.S. Damerell, F.J.M. Farley, A.R. Gillman and F.J. Wickens . . . **185** (1981) 33
Capacitative charge division read-out with a silicon strip detector, J.B.A. England, B.D. Hyams, L. Hubbeling, J.C. Vermeulen and P. Weilhammer . . . **185** (1981) 43
High resolution time-of-flight measurements in small and large scintillation counters, G. d'Agostini, G. Marini, G. Martellotti, F. Massa, A. Rambaldi and A. Sciubba . . . **185** (1981) 49
Application of wavelength-shifter techniques to position measuring counters, P. Klasen, K. Kleinknecht and D. Pollmann . . . **185** (1981) 67
A design for one millimeter pitch multiwire proportional chambers operating at high rates, R.R. Crittenden, S.C. Ems, R.M. Heinz and J.C. Krider . . . **185** (1981) 75
Hydrogen streamer chamber with laser registration, A.G. Kalimov, V.S. Kozlov, M.V. Stabnikov, V.I. Tarakanov, M.A. Tombak, A. Budziak, I.C. Ivanov and Yu.A. Shcherbakov . . . **185** (1981) 81
Thallium formate heavy liquid counter "HELICON" as a total absorption calorimeter, A. Kusumegi, K. Kondo, Y. Watase, Y. Yoshimura and K. Miyake . . . **185** (1981) 83
A muon monitor for neutrino flux measurement, N.V. Baggett, E.C. Fowler, G.R. Kalbfleisch and J. Alspector . . . **185** (1981) 87
Large proportional chambers of muon detection in the CELLO experiment at PETRA, R. Aleksan, J. Bouchez, G. Cozzika, Y. Ducros, A. Durand, G. Francinet, A. Gaidot, J. Heitzmann, H. Martin, J.C. Maillet, A. Patoux, F. Pierre, J. Pamela, J.P. Pansart, J.C. Raoul, B. Rousse and G. Souchère . . . **185** (1981) 95
Performance characteristics of large aperture, ten-cell atmospheric pressure isobutane Cherenkov counters, J. Hylen, Z. Ming Ma, A. Jawahery, T. Maruyama and R.H. Milburn . . . **185** (1981) 107
Fiber-optics light guides for thin scintillators, M.-J. Yang, R. Gabriel, W.W. Kinnison, H.S. Matis and H.L. Anderson . . . **185** (1981) 115
Practical prototype of a cluster-counting transition radiation detector, C.W. Fabjan, W. Willis, I. Gavrilenko, S. Maiburov, A. Shmeleva, P. Vasiljev, V. Chernyatin, B. Dolgoshein, V. Kantserov, P. Nevski and A. Sumarokov . . . **185** (1981) 119
A possible source of monochromatic photons below 100 MeV, H.S. Camarda . . . **185** (1981) 125
A description of the ferromagnetic levitation electrometer used in the search of quarks in matter, M. Marinelli, G. Gallinaro and G. Morpurgo . . . **185** (1981) 129
The effect of wavelength shifters on water Cherenkov detectors (*Letter to the Editor*), G. Badino, P. Galeotti, L. Periale, O. Saavedra and A. Turtelli . . . **185** (1981) 587
The operation of a pressurized ultraviolet photoionization threshold Cherenkov counter, N. Harnew and D.I. Meyer . . . **186** (1981) 513
Design of a plastic scintillator hodoscope with one millimeter spatial resolution, R.R. Crittenden, S.C. Ems, R.M. Heinz and J.C. Krider . . . **186** (1981) 519
Investigation of some characteristics of a liquid methane pulsed ionization chamber, A.S. Barabash, A.A. Golubev, O.V. Kazachenko, V.M. Lobashev and B.M. Ovchinnikov . . . **186** (1981) 525
Parametrization of the longitudinal development of hadronic shower in sampling calorimeters, R.K. Bock, T. Hansl-Kozanecka and T.P. Shah . . . **186** (1981) 533
A time projection chamber for precise vertex determination, S. Benso and L. Rossi . . . **187** (1981) 355
Operation of a bubble chamber filled with argon, nitrogen, and argon–nitrogen mixtures, G. Harigel, G. Linser and F. Schenk . . . **187** (1981) 363
A fast scintillator module with uniform response, B. Asman, R.E.S. Berglund, P.J. Carlson and K. Jon-And . . . **187** (1981) 371
Development of resistive plate counters, R. Santonico and R. Carderelli . . . **187** (1981) 377
Delay-line readout drift chambers, L.G. Atencio, J.F. Amann, R.L. Boudrie and C.L. Morris . . . **187** (1981) 381
Curvature measurements in nuclear emulsions, E. Lamanna, G. Romano and C. Sgarbi . . . **187** (1981) 387
Estimation of energy of the primary particle in hadron–nucleus interactions in emulsion, N.S. Arya, D.P. Goyal, S.K. Jain, A. Mozumder, S. Roy, P.K. Sengupta and S. Singh . . . **187** (1981) 393
The measurement of intense particle beams, R.P. Mount . . . **187** (1981) 401

Observation of the Fermi plateau in the ionization energy loss of high-energy protons and pions in hydrogen gas, J.P. Burq, M. Chemarin, M. Chevallier, A.S. Denisov, T. Ekelöf, P. Grafström, E. Hagberg, B. Ille, A.P. Kashchuk, A.V. Kulikov, M. Lambert, J.P. Martin, S. Maurv, M. Querrou, V.A. Schegelsky, I.I. Tkach and A.A. Vorobyov . . . **187** (1981) 407
A missing-mass spectrometer for momenta below 1.5 GeV/c, G. D'Agostini, M. Arrignon, G. Auriemma, A. Bezaguet, J.P. de Brion, A. Caillet, J.B. Chèze, J. Derré, G. Ducastaing, G. Durand, E. Gennari, M. Lemoine, R. Llosa, G. Marel, G. Marini, G. Martellotti, F. Massa, A. Nigro, E. Pauli, C. Pigot, A. Rambaldi, S. Reucroft, C.E. Roos, B. Rothan, K. Schultze, A. Sciubba, S. Tentindo, G. Vrana, M. Webster and E.G.H. Williams . . . **188** (1981) 29
A calorimeter for high-energy heavy ions, J. Stevenson, J. Martinis and P.B. Price . . . **188** (1981) 41
A position sensitive parallel plate avalanche counter to detect minimum ionizing particles, M. Urban, W.R. Graves and C. Heil . . . **188** (1981) 47
Systematic shifts of evaluated charge centroid for the cathode read-out multiwire proportional chamber, I. Endo, T. Kawamoto, Y. Mizuno, T. Ohsugi, T. Taniguchi and T. Takeshita . . . **188** (1981) 51
A simple technique for measuring with high accuracy relative wire positions in MWPCs, H.B. Dijkstra, C.J. Hardwick and W. Hoogland . . . **188** (1981) 59
Low cost lead glass Cherenkov detectors (*Letter to the Editor*) P.D. Grannis, D. Jaffe and M.D. Marx . . . **188** (1981) 239
The design and performance of a stereo drift chamber with closely packed planes, R.D. Bolton, R.D. Carlini, M.D. Cooper, D.-V. Minh, J.S. Frank, H.S. Matis, R.E. Mischke, V.D. Sandberg, J.P. Sandoval, R.L. Talaga and D.P. Grosnick . . . **188** (1981) 275
A segmented calorimeter for high-P_t jet experiments, P. Rapp, P. Devensky, B.C. Brown, H. Haggerty, R. Abrams, F. Lopez, D. McLeod and H. Strobele . . . **188** (1981) 285
The spiral projection chamber (SPC): a central detector with high resolution and granularity suitable for experiments at LEP (*Letter to the Editor*), U. Gastaldi . . . **188** (1981) 459
Multiple time digitizers and a trigger system for drift chambers – a complement (*Letter to the Editor*), K. Eggert, C. Engster, L. van Koningsveld, G. Por and H. Verweij . . . **188** (1981) 463
A triangular tube proportional wire chamber system, D.H. Badtke, J.A. Bakken, B.A. Barnett, B.J. Blumenfeld, C.Y. Chien, L. Madansky, J.A.J. Matthews, A. Pevsner, W.J. Spangler, K.L. Lee, M. Nakamura and S.R. Olson . . . **188** (1981) 497
Hodoscope gamma spectrometer GAMS-200, F. Binon, C. Bricman, V.A. Davydov, S.V. Donskov, J. Dufournaud, P. Duteil, M. Gouanère, A.V. Inyakin, V.A. Kachanov, D.B. Kakauridze, G.V. Khaustov, A.V. Kulik, J.P. Lagnaux, A.A. Lednev, Yu.V. Mikhailov, J.P. Peigneux, Yu.D. Prokoshkin, Yu.V. Rodnov, R. Roosen, S.A. Sadovsky, D. Sillou, A.V. Starzev, J.P. Stroot and V.P. Sugonyaev . . . **188** (1981) 507
On the formation of narrow bubble tracks by a laser beam in argon, nitrogen and hydrogen bubble chambers, G. Harigel, H.J. Hilke, G. Linser and F. Schenk . . . **188** (1981) 517
Properties of argon–ethane/methane mixtures for use in proportional counters. S. Behrends and A.C. Milissinos . . . **188** (1981) 521
Measurements of radial and longitudinal hadron shower development at 300 GeV, P.J. Gollon, M. Awschalom, S.I. Baker, L. Coulson, C. Moore and S. Velen . . . **189** (1981) 387
Track and bubble density measurment with KAMA-II, N. Fujiwara, S. Noguchi, C. Hakamada, E. Muraoka, S. Yamashita and A. Ono . . . **189** (1981) 395
On the possibility of using the correlations existing in electron–photon cascades for determination of the π-meson beam composition, M.J. Borkowski . . . **189** (1981) 405
Controlled mixer for the gas to the drift chambers in the axial field spectrometer in the CERN intersecting storage rings, P.K. Frandsen and H. Hofmann . . . **189** (1981) 409
A 32-channel amplifier for proportional inclined chamber (*Letter to the Editor*), G. Barichello and D. Pascoli **189** (1981) 621
An NaI(Tl)–^{241}Am high reliability, constant amplitude light pulser (*Letter to the Editor*), M. Kobayashi, K. Takamatsu, Y. Matsumoto and Y. Nakamura . . . **189** (1981) 625
A bismuth germanate scintillator as a total absorption shower detector (*Letter to the Editor*), M. Kobayashi, S. Kurokawa, S. Sugimoto, Y. Yoshimura, M. Chiba, H. Yoshida, M. Ishii, S. Akiyama and H. Ishibashi . **189** (1981) 629
Experimental results on the Cherenkov light produced by 500 MeV electrons in water, L. Behr, P. Benkheiri, A. Benyagoub, E. Dahome, J. Guillon, F. Jacquet, L. Kalt, G. Pindat and M. Urban . . . **190** (1981) 5
A lithium lens for axially symmetric focusing of high energy particle beams, B.F. Bayanov, J.N. Petrov, G.I. Sil'vestrov, J.A. MacLachlan and G.L. Nicholls . . . **190** (1981) 9
A shower detector of an improved scintillator glass and its longitudinal response, M. Chiba, M. Kobayashi, Y. Yoshimura, J. Iwahori, H. Yoshida, F. Takeutchi and H. Itoh . . . **190** (1981) 15
Electron cooling in ICE at CERN, M. Bell, J. Chaney, H. Herr, F. Krienen, P. Møller-Petersen and G. Petrucci . . . **190** (1981) 237
Experiments with the CERN superconducting 500 MHz cavity, Ph. Bernard, G. Cavallari, E. Chiaveri, E. Haebel, H. Heinrichs, H. Lengeler, E. Picasso, V. Piciarelli, J. Tückmantel and H. Piel . . . **190** (1981) 257

A rapid cycling hydrogen bubble chamber with high spatial resolution for visualizing charmed particle decays, J.L. Benichou, A. Hervé, H. Leutz, G. Passardi, W. Seidl, J. Tischhauser, H. Wenniger and C.M. Fisher **190** (1981) 487
A laser based time and amplitude calibration system for a scintillator counter hodoscope, S. Berglund, P.J. Carlson and J. Jacobson **190** (1981) 503
A method for tension control of MWPC wires, B. Koene and L. Linssen **190** (1981) 511

Instruments and Methods for Nuclear Spectroscopy

Szintillationen in Ionisations-Kammern, R. Horstmann, R. Langkau und W. Scobel **184** (1981) 413
An analogue particle identifier for heavy ions, W. Bohne and J. Lauch **184** (1981) 419
A nuclear reaction product mass spectrometer, T.M. Cormier and P.M. Stwertka **184** (1981) 423
Filtering of elastically scattered neutrons by statistical chopper at pulsed neutron sources, L. Cser, F. Ferenczy, N. Kroó, G.Y. Rubin, G. Zsigmond and V.G. Simkin **184** (1981) 431
Some activation measurements with $^{3}H(d, n)^{4}He$ neutrons, R.A. Jarjis **184** (1981) 439
Experimental investigation on the neutron detection efficiency of an NE104 scintillator, P. Boccaccio, F. Gramegna, G. Viesti and W. Augustyniak **184** (1981) 445
In-beam measurement of the circular polarization of continuous gamma-ray spectra, W. Trautmann, C. Lauterbach, J. de Boer, W. Dünnweber, G. Graw, W. Hamann, W. Hering and H. Puchta **184** (1981) 449
A parallel plate avalanche counter as active aperture of a magnetic spectrometer, H. Lettau, H.G. Bohlen, M.R. Clover, G. Ingold, H. Ossenbrink and W. von Oertzen **184** (1981) 461
A normalization standard for neutron capture probability in the resonance region, M. Ohkubo **184** (1981) 465
Analyse du fonctionnement du spectromètre à coincidence et addition; application à l'étude de ^{207}Bi et ^{110m}Ag, G. Mallet et M.S. Pravikoff **184** (1981) 469
Possibility of a high-resolution nuclear radiation detector using a superconductor. I. Mean energy loss per excess quasiparticle, M. Kurakado and H. Mazaki **185** (1981) 141
Possibility of a high-resolution nuclear radiation detector using a superconductor. II. Tunnel junction, M. Kurakado and H. Mazaki **185** (1981) 149
Large area position-sensitive channel-plane detector system and ΔE–E ionization chamber for a time-of-flight spectrometer, R.E. Renfordt, H. Noll and K. Sapotta **185** (1981) 157
A large position-sensitive neutron detector, P. Netter, L. Lassen, R. Schreck and H. Gemmeke **185** (1981) 165
An automatic device for sampling of thin assays of short-lived radionuclides in a liquid flow, S.I. Növik, T. Björnstad, J. Alstad, K. Brodén and G. Skarnemark **185** (1981) 175
A new method of intrinsic alpha particle discrimination by using parallel plate avalanche counters, W. Neubert **185** (1981) 181
A simple light guide for coupling to thin scintillator sheets, E.R. Kinney, J.L. Matthews, W.W. Sapp, R.A. Schumacher and R.O. Owens **185** (1981) 189
A self-consistent method for calculating the evaporation of heavy fragments following energetic initial reactions, R.E.L. Green and R.G. Korteling **185** (1981) 195

Proceedings of the 10th International Conference on Electromagnetic Isotope Separators and Techniques related to their Applications

Zinal, September 1–6 1980

Part I. Stable isotope separation

Mass analysis of milligram samples with the high current isotope separator MEIRA, G.D. Lempert and I. Chavet **186** (1981) 1
Preparation of thin targets with the isotope separator PARIS, R. Meunier, J.L. Daban-Haurou, M. Salomé and F. Nickel **186** (1981) 7
Recent refinements of the separator MEIRA and high enrichment separation results, G.D. Lempert, M. Menat and I. Chavet **186** (1981) 13
The influence of sparking on the attainable isotopic enrichment in electromagnetic isotope separation, I. Salzman and M. Menat **186** (1981) 21
Electromagnetic separation of stable isotopes at the Institute of Atomic Energy, Academia Sinica, Hua Ming-da, Li Gong-pan, Su Shi-jun, Mao Nai-feng and Lu Hung-yung **186** (1981) 25

Part II. On-line separator facilities

Trends in the study of nuclei by means of on-line separators, B. Jonson **186** (1981) 35
The Chalk River on-line isotope separator, H. Schmeing, J.C. hardy, E. Hagberg, W.L. Perry, J.S. Wills, J. Camplan and B. Rosenbaum **186** (1981) 47

Status report on the GSI on-line mass separator facility, C. Bruske, K.H. Burkard, W. Hüller, R. Kirchner, O. Klepper and E. Roecki . . . **186** (1981) 61
Present status of the UNISOR facility, E.H. Spejewski, R.L. Mlekodaj and H.K. Carter . . . **186** (1981) 71
Design study of the proposed SIN-ISOLDE facility, J. Domingo, P.G. Hansen, B. Jonson, E. Klugler, H.L. Ravn, S. Sundell, C. Tschalär and the ISOLDE Collaboration . . . **186** (1981) 79
The PS on-line mass spectrometer dedicated to the study of the exotic light nuclei, M. de Saint Simon, R. Fergeau, M. Jacotin, J.F. Kepinski, R. Klapisch, C. Thibault, F. Touchard, M. Langevin and D. Guillemaud . . . **186** (1981) 87
Description and performance of the ISOCELE 2 separator, P. Paris, C.F. Liang, D. Lecouturier, M. Arianer, J. Obert, A. Caruette, A. Ferro, J. Fournet, J.C. Putaux, J.L. Sarrouy and the ISOCELLE Collaboration . . . **186** (1981) 91
Present status and expected evolution of LISOL, The Leuven isotope separator on-line, J. Verplancke, B. Brijs, K. Cornelis, J. Gentens, M. Yuyse and G. Lhersonneau . . . **186** (1981) 99
PARSIFAL, an isotope separator for radiochemical applications, J. Césario, A. Juéry, J. Camplan, R. Meunier and B. Rosenbaum . . . **186** (1981) 105
A helium-jet type ISOL at the Kyoto University Reactor, K. Okano, Y. Kawase, K. Kawade, H. Yamamoto, M. Hanada, T. Katoh and I. Fijiwara . . . **186** (1981) 115
A new EMIS facility at the Tohoku University cyclotron, M. Fujioka, T. Shinozuka, E. Tanaka, Y. Arai, S. Hayashibe and T. Ishimatsu . . . **186** (1981) 121
Performance of the on-line isotope separation facility HELIOS at the Mainz reactor, A.K. Mazumdar, H. Wagner, W. Walcher, M. Brügger and N. Trautmann . . . **186** (1981) 131
The helium-jet coupled mass separator – advances and directions, D.M. Moltz . . . **186** (1981) 135
Advances in the helium-jet coupled on-line mass separator RAMA, D.M. Moltz, J. Äystö, M.D. Cable, R.F. Parry, P.E. haustein, J.M. Wouters and J. Cerny . . . **186** (1981) 141
A study of a helium-jet ion guide for an on-line isotope separator, J. Ärje, J. Äystö, J. Honkanen, K. Valli and A. Hautojärvi . . . **186** (1981) 149
Basic studies of a gas-jet-coupled ion source for on-line isotope separation, R.A. Anderl, V.J. Novick and R.C. Greenwood . . . **186** (1981) 153

Part III. Laser techniques related to the use of isotope separators

Laser spectroscopy on mass-separated radioactive beams, R. Neugart . . . **186** (1981) 165
Laser fluorescence spectroscopy on fast ion beams at the Marburg separator, H. Wagner, K. Dörschel, C. Höhle, H. Hühnermann and Th. Meier . . . **186** (1981) 177
Centrifugal mass separation in laser-initiated vacuum arcs, M. Geva, M. Kislman and J.L. Hirshfield . . . **186** (1981) 183
Ion implantation and laser annealing, G. Sørensen . . . **186** (1981) 189
On-line laser spectroscopy with thermal atomic beams, C. Thibault, P. Guimbal, R. Klapisch, M. de Saint Simon, J.M. Serre, F. Touchard, S. Büttgenbach, H.T. Duong, P. Jacquinot, P. Juncar, S. Liberman, P. Pillet, J. Pinard, J.L. Vialle, G. Huber and A. Pesnelle . . . **186** (1981) 193

Part IV. Techniques related to on-line separators

Mössbauer resonance-scattering techniques for emission spectroscopy on gamma radiation from short-lived radioactive isotopes, G. Weyer . . . **186** (1981) 201
Nuclear orientation of on-line separated isotopes, D. Vandeplassche, L. Vanneste, H. Pattyn, J. Geenen, C. Nuytten and E. van Walle . . . **186** (1981) 211
Trapping of ions injected from an external source into a three-dimensional quadrupole trap, H.A. Schuessler and Chung-sing O . . . **186** (1981) 219
Design and construction of a versatile tape-transport system controlled by a microcomputer, Y. Arai, E. Tanaka, T. Ishimatsu and M. Fujioka . . . **186** (1981) 231
A new concept for a compact tape transport system, R.L. Mlekodaj, E.F. Zganjar and J.D. Cole . . . **186** (1981) 239
A versatile data aquisition system and the ISOL facility TRISTAN, R.L. Gill, M.L. Stelts, R.E. Chrien, V. Manzella, H. Liou and S. Shostak . . . **186** (1981) 243
The halflife of ^{194}Hg determined by means of quantitative on-line mass separation, P. Hornshøj, H.L. Nielsen, N. Rud and H.L. Ravn . . . **186** (1981) 257
Application of on-line ABMR techniques to nuclides far from stability, C. Ekström . . . **186** (1981) 261
High voltage stabilisation for an on-line isotope separator, K.-H. Georgi . . . **186** (1981) 271

Part V. Ion sources techniques

Progress in ion source development for on-line separators, R. Kirchner . . . **186** (1981) 275
The ion sources for the GSI on-line separator, R. Kirchner, K.H. Burkard, W. Hüller and O. Klepper . . . **186** (1981) 295

Intense beams of radioactive halogens produced by means of surface ionization, B. Vosicki, T. Bjørnstad, L.C. Carraz, J. Heinemeier and H.L. Ravn . . . **186** (1981) 307
A new high temperature ISOL ion source with an electron-extracting grid, R.L. Mlekodaj . . . **186** (1981) 315
On ohmic-heated thermal-ionization source, E.H. Spejewski . . . **186** (1981) 317
Target ion source systems at the Orsay ISOCELE 2 separator, J.C. Putaux, J. Obert, L. Kotfila, B. Roussiere, J. Sauvage-Letessier, C.F. Liang, A. Peghaire, P. Paris, J. Giraux and the ISOCELE Collaboration . . . **186** (1981) 321
Production of ionic and atomic beams of alkaline elements, F. Touchard, J. Biderman, M. de Saint Simon, C. Thibault, G. Huber, M. Epherre and R. Klapisch . . . **186** (1981) 329
Penning ionization in a plasma ion source, D. Maçzka, A. Meldizon, W. Żuk and A. Latuszyński . . . **186** (1981) 335
A high-temperature ion source for the on-line separator OSTIS, J. Münzel, H. Wollnik, B. Pfeiffer and G. Jung . . . **186** (1981) 343
A negative surface ionization integrated target-ion source for an on-line isotope separator, M. Shmid, G. Engler, I. Yoresh and E. Skurnik . . . **186** (1981) 349
Some experimental studies of the calutron ion source, Li Gong-pan, Li Zeng-pu, Pei Tian-li and Wang Chao-ju . . . **186** (1981) 353

Part VI. Target techniques for on-line separators

Thermochemistry, D.L. Hildenbrand . . . **186** (1981) 357
Chemical separation combined with an ISOL-system, G. Rudstam, P. Aagaard, P. Hoff, B. Johansson and H.-U. Zwicky . . . **186** (1981) 365
Molecular ion techniques at the OSIRIS mass separator, P. Hoff, L. Jacobsson, B. Johansson, P. Aagaard, G. Rudstam and H.-U. Zwicky . . . **186** (1981) 381
Determination of release times and separation efficiencies at the GSI on-line separator, O. Klepper . . . **186** (1981) 385
New targets for on-line mass separation of nuclei formed in 600 MeV proton and 910 meV ^{3}He reactions, T. Bjørnstad, L.C. Carraz, H.Å. Gustafsson, J. Heinemeier, B. Jonson, O.C. Jonsson, V. Lindfors, S. Mattsson and H.L. Ravn . . . **186** (1981) 391
Fast isobaric separation at the collector of ISOL-facilities, G.J. Beyer, A.F. Novgorodov, A. Kovalev, F. Prazak, V.A. Khalkin and Yu.V. Yushkevich . . . **186** (1981) 401
Diffusion of radioisotopes from solids in the form of foils, fibers and particles, M. Fujioka and Y. Arai . . . **186** (1981) 409

Part VII. Recoil ion analyzers

Progress in recoil spectrometers for separation of fast nuclear reaction products, H.A. Enge . . . **186** (1981) 413
The velocity filter SHIP, performance and survey of current experiments, G. Münzenberg, W. Faust, F.P. Hessberger, S. Hofmann, W. Reisdorf, K.-H. Schmidt, W.F.W. Schneider, H. Schött, P. Armbruster, K. Güttner, B. Thuma, H. Ewald and D. Vermeulen . . . **186** (1981) 423
A reaction product mass separator for energetic particles at MSU, L.H. Harwood and J.A. Nolen, Jr . . . **186** (1981) 435
A Q-value for time-of-flight separators, H. Wollnik . . . **186** (1981) 441

Part VIII. Ion optics

Design and use of pole face correction coils, J. Camplan and R. Meunier . . . **186** (1981) 445
A variable geometry retardation collector for low energy sputtering experiments, E. Hechtl . . . **186** (1981) 453
Improved resolving power of an ISOLDE type isotope separator, B.R. Nielsen . . . **186** (1981) 457

Part IX. Ultra-sensitive mass spectroscopy

Ultra-sensitive mass spectrometry with tandem accelerators, A.E. Litherland, R.P. Beukens, L.R. Kilius, J.C. Rucklidge, H.E. Gove, D. Elmore and K.H. Purser . . . **186** (1981) 463
Decay of the nucleon – a geochemical approach based on ultra-sensitive mass spectroscopy, K.W. Allen . . . **186** (1981) 479
Electromagnetic isotope separation as a method of improving the detection limits of accelerator spectrometry, G.M. Raisbeck and F. Yiou . . . **186** (1981) 483
Isotopic ratio measurement at abundance sensitivities greater than $1:10^{15}$: a comparison between mass spectrometry at keV and MeV energies, K.H. Purser, P. Williams, A.E. Litherland, J.D. Stein, H.A. Storms, H.E. Gove and C.M. Stevens . . . **186** (1981) 487

Application of a simple MWPC to measurement of heavy ($A \sim 200$) evaporation residues, J.R. Leigh, D.J. Hinde and W. Galster . . . **186** (1981) 541

Experience with a Compton-suppressed spectrometer in (heavy ion, xn) reactions; peak rejection in singles and coincidence measurements, G.D. Dracoulis . . . **187** (1981) 413
Application of a multiwire proportional chamber for the measurement of differential (n, charged paticle) cross sections, C. Derndorfer, R. Fischer, P. Hille, G. Stengl and H. Vonach . . . **187** (1981) 423
A double mini-orange spectrometer (*Letter to the Editor*), R.V.F. Janssens, J.F.W. Jansen, J. van Klinken, S.P. Steendam, J. Lukasiak, W.Z. Venema and W.E.M.P.E. Wempe . . . **187** (1981) 635
Measurement of threshold for the long-period activity in the reaction ^{39}K(α, n)^{38}K (*Letter to the Editor*), N.M. Chaudri . . . **187** (1981) 639
Cross contamination of masses in surface ioinization integrated target-ion-sources for on-line isotope separators (*Letter to the Editor*), G. Engler, M.S. Rapaport, I. Yoresh and E. Skurnik . . . **187** (1981) 643
A Compton polarimeter with a pair of high-purity Ge diodes, T. Matsuzaki, H. Taketani, M. Ishii and M. Ohshima . . . **188** (1981) 63
Digitization and reconstruction of self-shunted streamer chamber tracks using a television system, A. Cavestro, M. Schiavon, M. Vascon, G. Zanella, F. Balestra, L. Busso and G. Piragino . . . **188** (1981) 69
Low energy proton and electron responses of an *n*-octane liquid scintillator, M.H. Wood, S.M. Blankenship, T.P. Lang, F.T. Avignone III, G.L. Morgan and S. Raman . . . **188** (1981) 75
Determination of the thermal radiative capture cross section of ^{14}N (*Letter to the Editor*), M.A. Islam, W.V. Prestwich and T.J. Kennett . . . **188** (1981) 243
A two-dimensional position sensitive ΔE–E counter for energetic light charged particles, W.W. Wilcke, J.R. Birkelund, J.P. Kosky, H.J. Wollersheim, A.D. Hoover, J.R. Huizenga, W.U. Schröder, L.E. Tubbs and D. Hilscher . . . **188** (1981) 293
A charged-particle spectrometer for the measurement of neutron-induced reactions, J.F. Gilot, A. Bol, P. Leleux, P. Lipnik and P. Macq . . . **188** (1981) 305
Use of plastic track detectors for studying the characteristics of fast neutron collimators, N.A. Khan, H.A. Khan, R.A. Akber, M. Ahmed, K. Jamil, K. Nadeem, M. Anwar and K. Gul . . . **188** (1981) 309
Bismuth germanate scintillators as detectors for high-energy gamma radiation, D.M. Drake, L.R. Nilsson and J. Faucett . . . **188** (1981) 313
Proton loss by nuclear inelastic interactions in germanium (*Letter to the Editor*), R.F. Carlson, A.J. Cox, R. Abegg, N.E. Davison, D.K. Hassell, R.H. McCamis, T.N. Nasr and W.T.H. van Oers . . . **188** (1981) 465
The electrostatic ellipsoidal mirror: a fast and efficient separator for slowly recoiling and highly charged nuclei, G. Giorginis, H. Bohn, T. Faestermann, F.V. Feilitzsch, P. Kienle, C. Kozhuharov and T. Yamazaki **188** (1981) 535
Performance of a 4 GeV/c magnetic spectrograph taking advantage of the third integral resonant extraction properties to operate in the energy loss mode, E. Grorud, J.L. Laclare, A. Ropert, A. Tkatchenko, J. Banaigs and M. Boivin . . . **188** (1981) 549
A time-of-flight spectrometer using heavy ion pulses, B. Kolb, G. Hlawatsch, G. Rosner, Th. Walcher, H. Ingwersen, E. Jaeschke and R. Repnov . . . **188** (1981) 555
A new position measurement for ionization chambers, G. Rosner, B. Heck, J. Pochodzalla, G. Hlawatsch, B. Kolb and A. Miczaika . . . **188** (1981) 561
Compton-suppression spectrometer for in-beam coincidence measurements and proposal for a detector configuration of two veto systems with a large solid angle, P. Herges and H.V. Klapdor . . . **189** (1981) 415
A position sensitive proportional counter for a beta-ray spectrometer II, Y. Yoshida, K. Tsuji, S. Umesaki and K. Marubayashi . . . **189** (1981) 423
Improved analysis of γ-ray angular distributions in (particle, xn) experiments, V.A. Ionescu, J. Kern, C. Nordmann, S. Olbrich and W. Reichart . . . **190** (1981) 19
0° cross section for the ^{12}C(d, n$_0$)^{13}N reaction produced by means of beam stopping, S. Shirato . . . **190** (1981) 29
Nuclear alignment following compound nucleus reactions, P.A. Butler and P.J. Nolan . . . **190** (1981) 283
A large solid angle double-scattering apparatus, W. Grüebler, V. König, W.G. Weitkamp, P.A. Schmelzbach, B. Jenny and F. Sperisen . . . **190** (1981) 295
A set of high efficiency proton polarimeters for proton energies between 2 and 20 MeV, F. Sperisen, W. Grüebler, V. König, P.A. Schmelzbach, K. Elsener, B. Jenny and C. Schweizer . . . **190** (1981) 301
Magnetic quadrupole spectrometer for time-of-flight measurements, H. Ikezoe, Y. Tomita, N. Shikazono and T. Murakami . . . **190** (1981) 515
Small-angle neutron polarization for the ^{2}H($\vec{d}$, $\vec{n}$)^{3}He reaction near $E_d = 8$ MeV, W. Tornow, E. Woye, G. Mack, T.L. Walter, C.E. Floyd, P.P. Guss and R.C. Byrd . . . **190** (1981) 523
Sekundäre Szintillationen in einer Gitter-Ionisations-Kammer (*Letter to the Editor*), R. Horstmann, R. Langkau and W. Scobel . . . **190** (1981) 639

Computer Automated Measurement and Control

The high-speed ALU for wire chambers, S.P. Chernenko, J. Skvaril and Yu.V. Zanevsky . . . **186** (1981) 545
An autonomous CAMAC crate controlled by a personal computer, P. Klopf, L.A. van Rhee and W. Stüber . . **187** (1981) 435

Computer controlled table positioner, M. IMORI **187** (1981) 443
A multiplicity logic unit, J. BIAŁKOWSKI, M. MOSZYŃSKI and A. ZAGÓRSKI **189** (1981) 433
Real-time digital pre-analysis for heavy ion identification: two hardware algorithms, S. CAVALIERE, I. ORTOSECCO, A. PICCIALLI and P. PARASCANDOLO **189** (1981) 439
A low cost multi-hit time to digital converter system for drift chamber applications, W. FARR and D. WEISKAT . . **190** (1981) 35
A gain regulation system for a large set of photomultipliers using light-emitting diodes and optical fibers, M. DE PALMA, G. MAGGI, A. SACCHETTI, P. SPINELLI and F. WALDNER **190** (1981) 41

Nuclear Electronics

A new ratemeter concept for radiation measuring instruments, R.M. LONGDEN-THURGOOD and J. POPLE **184** (1981) 533
Signal location by uniform resistive anodes. (B) Circular anodes in the dc limit, G.W. FRASER and E. MATHIESON **184** (1981) 537
The use of a simple optical attenuator for sub-nanosecond walk calibrations of constant fraction discriminators (*Letter to the Editor*), P.N. GIBSON, C.F.G. DELANEY, G.E. NOLAN and E.C. FINCH **184** (1981) 591
Time domain noise calculation for the common base current amplifier configuration A. HRISOHO **185** (1981) 207
Timing coincidence studies with fast photomultipliers, M.A. RAOOF and S.A. RAOOF **185** (1981) 215
DAG, a digital-to-analog generator of coincident pulse pairs, P. GUAZZONI, P. MICHELATO, A. MORONI, L. ZETTA and G. TAIOCCHI **185** (1981) 219
Noise in resistive charge-division position-sensing methods (*Letter to the Editor*), J.C. VERMEULEN **185** (1981) 591
Subdivision of a graded-density cathode (*Letter to the Editor*), P.J. GILVIN, E. MATHIESON and G.C. SMITH **185** (1981) 595
A current-to-frequency converter, S.W. GIOWACKI **186** (1981) 549
GPG 2, a solid state high-voltage pulse generator, C. GIPPETTO **187** (1981) 447
Gamma spectroscopy system for high count rates (*Letter to the Editor*), P. MARANESI **187** (1981) 645
A digital random pulser for testing nuclear instrumentation, J.E. SWANSEN and N. ENSSLIN **188** (1981) 83
High capacity counting device for time analysis of light pulses, P. MILLET, H. DIJOLS, J. JULLY, A. BIROT, H. BRUNET, J. GALY and Y. SALAMERO **188** (1981) 93
A multistop time-to-digital converter, E. FESTA and R. SELLEM **188** (1981) 99
Tests on a digital neutron–gamma pulse shape discriminator with NE213, Z.W. BELL **188** (1981) 105
Evaluation of Thermometrics thermistors for use at cryogenic temperatures, W.J. ORVIS **188** (1981) 111
Electronics for shaft encoder (*Letter to the Editor*), K.S. KUCHELA **188** (1981) 247
Digital ratemeter, I.D. VANKOV and L.P. DIMITROV **188** (1981) 319
A pulse amplitude dividing circuit for nuclear applications, C. EDISS and S.A. MCQUARRIE **189** (1981) 445
Signal location by uniform resistive anodes: (C) Time-dependent performance, G.W. FRASER, E. MATHIESON, M. LEWIS and M. BARSTOW **190** (1981) 53
Timing discriminator using leading-edge extrapolation, B. GOTTSCHALK **190** (1981) 67
Gain variations of a phototube in the frequency domain at very short term, F. CELANI, A. CODINO, U. CORÀ, R. FALCIONI, G. FELICI, G. LEVY, B. D'ETTORRE PIAZZOLI, G. MANNOCCHI, G. BOLOGNA, P. PICCHI and S. FALCIANO **190** (1981) 71
Evaluation of pulse-shape discrimination capabilities of NE228A relative to NE213, R.E. HOWE **190** (1981) 309
Quad fast single channel analyser, J. BIALKOWSKI, J. STARKER and K. AGEHED **190** (1981) 531

Numerical and Data Analysis

Digitization errors using digital charge division position-sensitive detectors, R. BERLINER, D.F.R. MILDNER and O.A. PRINGLE **184** (1981) 477
A new method for the determination of goodness-of-fit in gamma spectroscopy, P.A. AARNIO, M.J. KOSKELO and P. ZOMBORI **184** (1981) 487
Some notes on peak fitting with an inadequate model in the analysis of Ge(Li) gamma spectra, V.P. KUZNECOV . **184** (1981) 493
Natural line-width effects in gamma- and X-ray emission rate meaurements with semiconductor detectors, K. DEBERTIN and W. PESSARA **184** (1981) 497
Reliability test of quasi-monochromatic photon experiments using bremsstrahlung, S.L. SHERLOCK, N. DYTLEWSKI, S.A. SIDDIQUI, H.H. THIES and M.L. THORNETT **184** (1981) 505
SANDRA, a precise and fast FORTRAN program for gamma-ray spectrum analysis using a small computer, J. MORALES, J. NAVARRO, M. PLÓ and J.A. VILLAR **184** (1981) 509
Organic scintillator efficiency using a Monte Carlo code, V. FAJER and L. ALVAREZ **184** (1981) 515
A computational study of the response of Ge and NaI(Tl) detectors to the inner bremsstrahlung of ^{90}Y, F.T. AVIGNONE III **184** (1981) 521
A correction formula for the counting loss in using a time to pulse height converter and experimental verification of the formula, T. AKIMOTO, I. MURAI, M. NAKATA and Y. OGAWA **184** (1981) 525
Scintillation intensity of NE-102A screens: numerical integration of an expression for the radioluminescence

yield, eventual application as a method of particle identification, L.M.I. DE CARVALHO and J. LOPES DA SILVA . . . **184** (1981) 563
Global track measuring algorithm using roads, L.R. FORTNEY and W.J. ROBERTSON . . . **185** (1981) 227
Pattern recognition in layered track chambers using a tree algorithm, D.G. CASSEL and H. KOWALSKI . . . **185** (1981) 235
Calculated differential π^+ production spectra at large angles from 28 GeV protons on a thick iridium target and comparisons with experimental data, R.G. ALSMILLER, JR., T.A. GABRIEL and B.L. BISHOP . . . **185** (1981) 253
AIFOM, an analytic formula for universal assessment of goodness-of-fit of gamma ray spectra, S.K. MISRA and N.E. EDDY . . . **185** (1981) 257
NOLIN: nonlinear analysis of complex alpha spectra, E. GARCIA-TORAÑO and M.L. ACEÑA . . . **185** (1981) 261
A new approach to the differentiation unfolding of neutron spectra from proton-recoil data, R.E. MORTON and G.L. WOODRUFF . . . **185** (1981) 271
Neutron spectral unfolding using the Monte Carlo method, K. O'BRIEN and R. SANNA . . . **185** (1981) 277
Measurement and parameterization of the response of NE102 to fast neutrons, S.D. MARTIN, JR., H.L. WOOLVERTON, R.L. YORK, S. NATH, K.K. SEKHARAN, J.C. HIEBERT and L.C. NORTHCLIFFE . . . **185** (1981) 287
The response function of large NaI detectors to high energy photons, P. CORVISIERO, M. TAIUTI, A. ZUCCHIATTI and M. Anghinolfi . . . **185** (1981) 291
Monte Carlo calculation of accurate response functions for a NaI(Tl) detector for gamma rays, K. SAITO and S. Moriuchi . . . **185** (1981) 299
A rapid method for the measurement of small peak shifts, G. BRUNNER . . . **185** (1981) 309
Depth selective conversion electron Mössbauer spectroscopy: comparison of experiment with Monte Carlo simulation of electron scattering, (*Letter to the Editor*) D. LILJEQUIST . . . **185** (1981) 599
Optimizing weights for least-squares Mössbauer spectra analysis, F. ARAMU, V. MAXIA and S. Serci . . . **186** (1981) 553
Unusual shape of the Mössbauer scattering line, J.J. BARA and B.F. BOGACZ . . . **186** (1981) 561
Calculations of the absolute peak efficiency of gamma-ray detectors for different counting geometries, L. MOENS, J. DE DONDER, LIN XI-LEI, F. DE CORTE, A. DE WISPELAERE, A. SIMONITS and J. HOSTE . . . **187** (1981) 451
Statistical fluctuation in the process of primary ionization in methane, J. PLANINIĆ . . . **187** (1981) 473
A method for separation of local and spatially distributed ionizations, R.A. ASTABATYAN, M.P. LORIKYAN, G.A. MANUKYAN and K.ZH. MARKARYAN . . . **187** (1981) 477
Calculated absolute photopeak efficiency values for true coaxial Ge(Li) detectors in the γ-ray energy region 0.1–3.0 MeV with annular source geometry, R. RIEPPO . . . **188** (1981) 115
Quantitative explanation of the position and profiles of the (n, α) and (n, p) lines observed in a Si detector irradiated with fast neutrons, G. PAIĆ, K. KADIJA, B. ILIJAŠ and K. KOVAČEVIĆ . . . **188** (1981) 119
Optimizing pulse pileup detection for soft X-ray spectroscopy, A.J. GREENBERGER . . . **188** (1981) 125
Analysis of the position resolution in centroid measurements in MWPC, E. GATTI, A. LONGONI, R.A. BOIE and V. RADEKA . . . **188** (1981) 327
Determination of proton spectra by thick target radioactive yields, T.P. INTRATOR, R.J. PETERSON, C.S. ZAIDINS and N.A. ROUGHTON . . . **188** (1981) 347
Monte Carlo calculations of the efficiencies and the parasitic pulses for a system of spherical sources and a 3″ × 3″ NaI(Tl) detector, S.N. KAPLANIS . . . **188** (1981) 353
Simulation, par méthode de Monte Carlo, d'une source de photons d'énergie variable, A. COQUETTE . . . **188** (1981) 361
A statistical analysis of imperfect eigenvalue sequences, W.A. WATSON III, E.G. BILPUCH and G.E. MITCHELL . . **188** (1981) 571
The calibration of a ^{3}He spectrometer and its use to measure the neutron spectrum from an Am/Li source, J.G. OWEN, D.R. WEAVER and J. WALKER . . . **188** (1981) 579
γ-ray energies from the decay of ^{99}Mo, ^{133}Ba and ^{210}Pb (*Letter to the Editor*), R.G. HELMER, A.J. CAFFREY, R.J. GEHRKE and R.C. GREENWOOD . . . **188** (1981) 671
Selective sampling – and alternative to coincidence counting, J.W. MÜLLER . . . **189** (1981) 449
Calculations of the interference of annihilation radiations with positron spectra in a Ge detector, F.T. AVIGNONE III, H. NOMA, D.M. MOLTZ and K.S. Toth . . . **189** (1981) 453
Experimental study of the response characteristics of large Ge(Li) detectors, B.W. SARGENT and A. HENRIKSON . **189** (1981) 459
Transformation of cross sections, H. HO and P.L. GONTHIER . . . **190** (1981) 75
A second stage trigger for track reconstruction based on contiguity ideas, G. DARBO and S. VITALE . . . **190** (1981) 81
SAMPO80: an accurate gamma spectrum analysis method for minicomputers, M.J. KOSKELO, P.A. AARNIO and J.T. ROUTTI . . . **190** (1981) 89
Efficiency calibration of a Ge(Li) detector at short source-to-detector distance, K. KAWADE, M. EZUKA, H. YAMAMOTO, K. SUGIOKA and T. KATOH . . . **190** (1981) 101
Automated analysis for high energy gamma ray spectra, T.J. KENNETT, W.V. PRESTWICH and R.J. TERVO . . . **190** (1981) 313
A new technique for the detection of special stochastic signals: an application to angular correlations, K. RAMA REDDY . . . **190** (1981) 325
Fit of the function $y(x) = A[1 - \exp(-kx)]$ to data strongly embedded in noise, H.P. GARNIR and F.S. GARNIR-MONJOIE . . . **190** (1981) 333
Measurements of backward scattering of neutrons II: neutron detection efficiency, B. MINETTI . . . **190** (1981) 337

Multiple channel $4\pi\beta$–γ anti-coincidence counting, A.P. Baerg **190** (1981) 345
The maximum likelihood method applied to the problem of multi-component decay, R.C. Eggers and L.P. Somerville **190** (1981) 535
Investigations of the response of germanium detectors to monoenergetic electron, positron and gamma ray beams, B.J. Varley, J.E. Kitching, W. Leo, J. Miskin, R.B. Moore, K.D. Wunsch, R. Decker, H. Wollnik and G. Siegert **190** (1981) 543
A modified version of the Monte Carlo computer code for calculating neutron detection efficiencies, K. Nakayama, E.F. Pessoa and R.A. Douglas **190** (1981) 555
Statistical correlations of Mössbauer spectra, B. Renard, H. Pollak, R. Quartier and P. Walter **190** (1981) 565

Fusion

A neutron spectrometer suitable for diagnostics of extended fusion plasmas, T. Elevant **185** (1981) 313
Neutron flux measurements around the Princeton large tokamak, G. Zankl, J.D. Strachan, R. Lewis, W. Pettus and J. Schmotzer **185** (1981) 321
Schlieren diagnostics of the Los Alamos hypersonic gas target neutron generator, A.A. Haasz and J.H. Lever . . **185** (1981) 331
The scaling laws of a cold gas-blanket experiment, A. Kuthy **185** (1981) 343
A miniature fast-neutron spectrometer for scalar spectrum measurement, H. Sekimoto, M. Ohtsuka and N. Yamamuro **189** (1981) 469
A fast neutron spectrometer for fusion experiments, M. Chatelier, J. Idmtal, A. Lagattu and A. Lepers **190** (1981) 107

Fission and Nuclear Reactors

Autobatch: I. System description for the automated batchwise isolation and study of short-lived fission products, O.G. Lien III, P.C. Stevenson, E.A. Henry, R.P. Yaffe and R.A. Meyer **185** (1981) 351
An automatic fission track scanner, H.P. Chou, R.H. Johnson and F.M. Clikeman **185** (1981) 359
The preparation of large area uranium target layers for a multiple parallel plate fission detector, H. Ries, J. Drexler, R. Fischer, W. Günther, K. Huber, U. Kneissl, H. Ströher and W. Wilke **185** (1981) 373
A new advanced fixed in-core instrumentation for a PWR reactor, M. Barbet and M. Guillery **185** (1981) 377
Investigation of a moderate SB–Be–photoneutron source and its application to the determination of the neutron importance function, D. Albert, K. Fährmann, E. Lehmann and E. Seifert **185** (1981) 387
An assessment of nuclear waste transmutation with proton accelerators, E.M. Krenciglowa and A.A. Harms . **185** (1981) 393
A remote device for de-encapsulating reactor-irradiated samples, (*Letter to the Editor*), G.P. Schwaiger and R.W. Fink **186** (1981) 663
Transport of 14 MeV and fission spectrum neutrons through spheres – an aid to shielding design, M.L. Stelts, S. Donaldson and J. Povelites **187** (1981) 483
Neutron diagnosis of two-phase flow, M.H. Younis, T.W. Hoffmann and A.A. Harms **187** (1981) 489
A method for measuring each concentration of β-emitting nuclides mixed in air, M. Chino, T. Iida, Y. Ikebe, K. Katsurayama, T. Tsujimoto and K. Yamazaki **187** (1981) 499
Experimental evaluation of fission spectrum averaged cross sections of ^{93}Nb(n, n′)^{93m}Nb and ^{199}Hg(n, n′)^{199m}Hg reactions (*Letter to the Editor*), K. Sakurai and I. Kondo **187** (1981) 649
A rotating wheel system for the detection of spontaneously fissioning nuclides from heavy ion reactions, H. Gäggeler, W. Brüchle, J.V. Kratz, M. Schädel, K. Sümmerer, W. Weber, G. Wirth and G. Herrmann **188** (1981) 367
A continuous on-line method for fission yield measurement with the combined GJRT-SISAK technique, T. Björnstad **188** (1981) 375
Comparison of surface barrier detector pulse height spectra of ^{244}Cm and ^{252}Cf spontaneous fission fragments, R. Schmidt and H. Henschel **188** (1981) 595
2 keV scandium filtered neutron beam using separated isotopes as a secondary filter, H. Aminfar and R.M. Brugger **188** (1981) 597
On the effective charge of fission fragments (*Letter to the Editor*), N.N. Demidovich, I.E. Nakhutin, V.G. Shatunov and M.P. Shapovalov **188** (1981) 673
A cryogenic ionization chamber for high-resolution fission cross-section measurements, R.C. Extermann, G.F. Auchampaugh, J.D. Moses, C.E. Olsen and N.W. Hill **189** (1981) 477
The liquid hydrogen moderator on the ZING-P′ pulsed spallation neutron source, J.M. Carpenter, R. Kleb, T.A. Postol, R.H. Stefiuk and D.F.R. Mildner **189** (1981) 485
Automatic spark counting of fission fragment tracks in Makrofol (*Letter to the Editor*), A.K. Sinha and G.K. Mehta **189** (1981) 633
A neutron multiplicity detector for rare spontaneous fission events, G.M. Ter-Akopian, A.G. Popeko, E.A. Sokol, L.P. Chelnokov, V.I. Smirnov and V.A. Gorshkov **190** (1981) 119

Absolute measurement of velocities, masses and energies of fission fragments from californium-252(SF), H. Henschel, A. Kohnle, H. Hipp and G. Gönnenwein . . . **190** (1981) 125
Design aspects of gamma densitometers for void fraction measurements in small scale two-phase flows, A.M.C. Chan and S. Banerjee . . . **190** (1981) 135
Detection of fission fragments by a parallel plate avalanche counter in the presence of an intense electron beam (*Letter to the Editor*), J.D.T. Arruda-Neto, R. Avida, J.R. Calerco, K.A. Griffioen, D.H.H. Hoffman, K.T. Knöpfle, K. van Bibber, R. Westerfelt and J.G. Woodworth . . . **190** (1981) 203
Neutron spectrum measurements using miniature proton recoil proportional spectrometers, D.W. Vehar and F.M. Clikeman . . . **190** (1981) 351
Measurements of the ^{235}U mass in a large volume multiplated fission ionization chamber, O.A. Wasson and M.M. Meier . . . **190** (1981) 571
The stepwise time dependent backward Kolmogorov equation with delayed neutrons in counting statistics. I. Mean value and variance, F. Carloni and M. Marseguerra . . . **190** (1981) 583

Dosimetry, Space Radiation and Medical Applications

Imaging X-ray spectrophotometers, C.J. Hailey, T.T. Hamilton and W.H.-M. Ku . . . **184** (1981) 543
Effect of residual thermoluminescence on the radiation induced sensitization of some TL phosphors, B. Chandra, R.C. Bhatt and S.J. Supe . . . **184** (1981) 549
Isothermal decay characteristics of $Li_2B_4O_7$: Mn phosphor, B. Chandra and R.C. Bhatt . . . **184** (1981) 557
Selective non-destructive determination of the sub-pCi levels of thorium in solutions, Y. Eyal . . . **184** (1981) 561
Thermoluminescence decay and emission spectra of some γ-irradiated alkali fluorides, A.V. Khedekar, R. Ramani, S.S. Sardesai and C.D. Kalkar . . . **184** (1981) 577
The calibration of neutron detectors with spherical moderators (*Letter to the Editor*), K.G. Harrison . . . **184** (1981) 595
Comparison of the efficiency values of HgI_2 and NaI detectors (*Letter to the Editor*), R. Rieppo . . . **184** (1981) 599
Radon/thoron detection properties of a CR-39 plastic track detector, H.A. Khan and I. Ahmed . . . **185** (1981) 401
Some electrochemical etching studies on the registration of alpha particle tracks in polycarbonate, M. Sohrabi and E. Khajeian . . . **185** (1981) 407
The UH-nuclei cosmic ray detector on the third high energy astronomy observatory, W.R. Binns, M.H. Israel, J. Klarmann, W.R. Scarlett, E.C. Stone and C.J. Waddington . . . **185** (1981) 415
A new experiment for measuring the flux of high energy iron nuclei in cosmic rays, R.K. Sood and J. Panetieri **185** (1981) 427
Characteristics of a gas proportional chamber for observations of shower particles, with applications to the shower transition curve in the high energy region, K. Mitsui . . . **185** (1981) 433
Calibration of a gamma ray telescope using tagged positron annihilation photons, D.L. Bertsch and W.R. Dodge . . . **185** (1981) 439
Radiation damage of the HEAO C-1 germanium detectors, W.A. Mahoney, J.C. Ling and A.S. Jacobson . . . **185** (1981) 449
TLD photon counting analyzer, D.W. Hanna and G.G. Simons . . . **186** (1981) 569
Measurements of characteristics of the gas proportional chamber in cosmic ray showers, K. Mitsui . . . **186** (1981) 579
Tests for a new type of calorimeter, the SPED, W. Kononenko, B.W. Robinson, W. Selove and G.E. Theodosiou . . . **186** (1981) 585
Position and energy resolution of the photo-ionization proportional scintillation (PIPS) chamber, M. Alegria Feio and A.J.P.L. Policarpo . . . **186** (1981) 593
Energy calibration of organic scintillation detectors for gamma rays (*Letter to the Editor*), R. Diehl and U. Graser . . . **186** (1981) 665
Degradation of polycarbonates with fast neutrons and gamma rays and its application in radiation dosimetry, M.A. Fadel, A.A. Abdalla and M.A. Hamied . . . **187** (1981) 505
On the measuring method of the dose distribution in solid state materials due to optical absorption of irradiated materials with charged particles, T. Nakajima and T. Kanai . . . **187** (1981) 513
Mixed field dosimetry with Al_2O_3 (Si, Ti) thermoluminescent phosphor, S.K. Mehta and S. Sengupta . . . **187** (1981) 515
Relative thermoluminescent response of LiF-TLD to 252 Cf fission fragments, Y.S. Horowitz and J. Kalef-Ezra . . . **187** (1981) 519
A four-sample, low-background α and β scintillation counter, L.P. Gregory and K.M. Matthews . . . **187** (1981) 527
An air shower array designed for cosmic ray variation measurements and high energy gamma ray astronomy, C. Morello and G. Navarra . . . **187** (1981) 533
Minimum detectable quantities of elements and compounds in a biological matrix, K. Kouris, N.M. Spyrou and D.F. Jackson . . . **187** (1981) 539
Monte Carlo calculations of a bismuth germanate scintillation detector, S.M. Alkhafaji . . . **187** (1981) 547
Calculated response of intrinsic germanium detectors to narrow beams of photons with energies up to ~ 300 keV, S.M. Seltzer . . . **188** (1981) 133
A high efficiency 4π neutron detector, B. Homqvist and E. Ramström . . . **188** (1981) 153

A multitrack drift chamber with 60 cm drift space, M. Rahman, I. Meyer, W.D. Dau, A. Stachmann, W. Stamm and H. Jokisch . . . **188** (1981) 159
A system to record the time spread of muons in extensive air showers, P.R. Blake, P.J. Connor, B. O'Connell, D.M. Mann, W.F. Nash and R.B. Strutt . . . **188** (1981) 389
A study of the pulse profiles from EAS muon scintillator detectors, P.R. Blake, P.J. Connor, D.M. Mann, W.F. Nash, B. O'Connell and R.B. Strutt . . . **188** (1981) 397
Timing properties of BGO scintillator, M. Moszyński, C. Gresset, J. Vacher and R. Odru . . . **188** (1981) 403
Relative thermoluminescent response of LiF-TLD to 4 keV X-rays, Y.S. Horowitz and J. Kalef-Ezra . . . **188** (1981) 603
An adapter for the Harshaw model 2000D TL analyzer system, V.P. Gupta, J.P. Cusimano and D. Parker . . . **188** (1981) 609
Design, calibration and sensitivity of a passively anti-collimated (PAC) gamma-ray telescope, J. Benson, J.O.D. Jardim, I.M. Martin, U.B. Jayanthi and O.D. Aguiar . . . **188** (1981) 613
Application of Geiger–Müller counters over a wide range of counting rates, A.R. Jones and R.M. Holford . . . **189** (1981) 503
Improved methods for obtaining high background rejection in proportional counters using guard cathodes, A. Smith and M.J.L. Turner . . . **189** (1981) 511
Characteristics of neutrons for Be targets bombarded with protons, deuterons and alpha particles, M.A. Lone, A.J. Ferguson and B.C. Robertson . . . **189** (1981) 515
Source-to-detector distance dependence and angular indepence of absolute activity measurements based on sum peaks (*Letter to the Editor*), I. Török and I. Uray . . . **189** (1981) 635
A preliminary study on the use of cadmium telluride detectors in the scintigraphy of thyroid gland (*Letter to the Editor*), A.M. Mancini, A. Quirini, L. Vasanelli, C. Bacci, R. Bernabel, R. Pani, B. Rispoli, P.L. Ballesio and C. Furetta . . . **189** (1981) 637
Properties of the channel electron multiplier arrays (CEMAs) for the SOLEX solar X-ray spectrometer/spectroheliograph, W. Eng, Jr. and P.B. Landecker . . . **190** (1981) 149
Light conversion efficiencies of ^{7}LiF thermoluminescent dosimeters (TLD-700) for protons with a non-monoenergetic energy distribution (*Letter to the Editor*), B. Mukherjee . . . **190** (1981) 207
Broad-range dosimetry with leuko dye optical waveguides, S. Kronenberg, W. McLaughlin and C.R. Siebentritt . . . **190** (1981) 365
A method for fragmentation analysis of accelerated high-energy heavy-ion beams, W. Heinrich, H. Drechsel, R. Rudat, E.V. Benton and D. Hildebrand . . . **190** (1981) 369
A one-dimensionally position-sensitive scintillation detector, B.J. Maddox, J.M. Galvin, K.R. Kase, J.C. Leong and B.E. Bjärngard . . . **190** (1981) 377

Synchrotron Radiation Research

High-intensity vacuum ultraviolet continuum emission from intense relativistic electron rings. U. Schumacher . **185** (1981) 545
Photoemissive effects and associated stresses in ultrafine transmission grating structures irradiated with synchrotron light, R. Tatchyn and I. Lindau . . . **185** (1981) 553
ESF Synchrotron Radiation News No. 6 . . . **185** (1981) 559
Grazing incidence optics for synchrotron radiation X-ray beamlines, S.M. Heald and J.B. Hastings . . . **187** (1981) 553
Power dissipation and thermal loading in ultrafine transmission grating structures irradiated with synchrotron light, R. Tatchyn and I. Lindau . . . **188** (1981) 165
The LELA undulator, R. Barbini, A. Cattoni, B. Dulach, C. Sanelli, M. Serio and G. Vignola . . . **190** (1981) 159
A high resolution position sensitive X-ray MWPC for small angle X-ray diffraction, J.E. Bateman, J.F. Connolly, R. Stephenson and G.J. Tappern . . . **190** (1981) 385
The new multi-purpose two-axis diffractometer for synchrotron X-rays at DORIS, U. Bonse and K. Fischer . . **190** (1981) 593

Materials Studies

Proceedings of the 2nd International Conference on Particle Induced X-ray Emission and its Analytical Applications
Lund, Sweden, June 9–12, 1980

Part I. X-ray production and attenuation

K X-ray production cross-sections induced by 1.6–4.0 MeV deuterons, Z. Szökefalvi-Nagy and I. Demeter . . **181** (1981) 1
Thin target measurements of proton induced L-shell X-ray cross-sections, R.S. Sokhi and D. Crumpton . . . **181** (1981) 5
Analytical approximations for X-ray attenuation coefficients, L. Gerward . . . **181** (1981) 11

Part II. Experimental arrangements. Targets

PIXE with high-energy proton beams, A. YAMADERA, K. ISHII, K. SERA, S. MORITA and T.C. CHU **181** (1981) 15
Calculation of pile-up intensities in PIXE spectra obtained by triggered beam pulsing, E. STEINBAUER **181** (1981) 21
A two-detector anticoincidence system for reduction of Compton scattered high energy γ-ray background in PIXE analysis, F. GLOYSTEIN, F.-W. RICHTER and U. WÄTJEN **181** (1981) 25
A simple method for elimination of charging, and for current integration in PIXE analysis of thick insulating samples, M.A. CHAUDHRI and A. CRAWFORD **181** (1981) 31
A completely automated PIXE analysis system and its applications, LI MING-CHIEN, SHENG KANG-LONG, CHIN PO-KANG, CHEN ZHI-XIANG, WANG XUE-PENG, CHIN JUN-FA, RONG TING-WEN, TAN MING-GUANG and XU YAO-LIONG **181** (1981) 37
Sample changing facility with electronic control in PIXE analysis, T. RAUNEMAA, M. VAITTINEN, J. RÄISÄNEN, T. TUOMI and M. GERLANDER **181** (1981) 43
A procedure for optimal determination of trace elements with PIXE, J.T.G.M. HEMELAAR, J.B.A.D. VAN ZON, J.A. VAN DER HEIDE and H.P.M. KIVITS **181** (1981) 49
The validation of a PIXE system for trace element analysis of biological samples, S.O. SAIED, D. CRUMPTON and P.E. FRANCOIS **181** (1981) 53
Attempts to improve PIXE quantitative trace element analysis of biomedical materials, G. ROBAYE, G. WEBER, J.M. DELBROUCK, I. ROELANDTS, P. BARTSCH and A. COLLIGNON **181** (1981) 59
Target preparation techniques for PIXE and XRF, F.A.J. DE ROOIJ, H.P.M. KIVITS, C.A.M. CASTELIJNS, G.P.J. WIJNHOVEN and J.J.M. DE GOEIJ **181** (1981) 63
Measurement of sample temperatures reached during proton and alpha particle irradiation of thin PIXE targets, M.W. HILL, L.D. HANSEN, N.F. MANGELSON, K.J. FAUCETTE, D.J. EATOUGH, T.A. CAHILL and B. KUSKO . . **181** (1981) 69
Evaluation of low temperature ashing of biological materials as a preconcentration method for PIXE analysis, PALLON and K.G. MALMQVIST **181** (1981) 71

Part III. Spectrum resolution. Calibration

The computer programme "LIFT" for X-ray fluorescence analysis, K. KAISLA, T. RAUNEMAA and P. PAATERO . . **181** (1981) 77
Calibration and long-term stability of a PIXE set-up, G.I. JOHANSSON, J. PALLON, K.G. MALMQVIST and K.R. AKSELSSON **181** (1981) 81

Part IV. Backscattering in combination with PIXE

PIXE calibration and absorption corrections with the aid of proton scattering, J.W. NELSON, S. BAUMAN and H.C. KAUFMANN **181** (1981) 89
Corrosion studies with PIXE, M.A. CHAUDHRI and A. CRAWFORD **181** (1981) 93
Proton backscatter as a means of mass normalization in PIXE scanning of human hair, S.B. RUSSEL, R.S. GIBSON, S. FAIQ and J.L. CAMPBELL **181** (1981) 97

Part V. Innovative uses of particle induced X-ray

High resolution X-ray spectroscopy, a perspective for plasma diagnostics, F. FOLKMANN, H.F. BEYER, R. MANN and K.-H. SCHARTNER **181** (1981) 99
The application of proton induced X-ray emission to radiography, M.F. MAHROK, D. CRUMPTON and P.E. FRANCOIS **181** (1981) 105
Comparison between PIXE and special XRF techniques applied to the analysis of individual particles, L.H. ANDERSSON **181** (1981) 109

Part VI. Microbeams and their applications

The use of the PIXE technique with nuclear microprobes, J.A. COOKSON **181** (1981) 115
The Eindhoven proton microbeam, M. PRINS and L.J.B. HOFFMAN **181** (1981) 125
A proton microbeam under construction, J.C. DEN OUDEN, A.J.J. BOS, R.D. VIS and H. VERHEUL **181** (1981) 131
The influence of secondary fluorescence from elements adjacent to the microbeam spot on local concentration determination with PIXE, D. HECK **181** (1981) 135
PIXE microprobe analysis with the Heidelberg proton microprobe, J.R. CHEN, H. KNEIS, B. MARTIN, R. NOBILING, D. PELTE, B. POVH and K. TRAXEL **181** (1981) 141
An application of SPM in the study of galactosemic cataract, H. KOYAMA-ITO, S.-T. SUN, I. NISHIO, T. TANAKA and L. GRODZINS **181** (1981) 149
Trace elemental analysis of bituminous coals using the Heidelberg proton microprobe, J.R. CHEN, H. KNEIS, B. MARTIN, R. NOBILING, K. TRAXEL, E.C.T. CHAO and J.A. MINKIN **181** (1981) 151

Proton microprobe analysis of zinc in skeletal tissues, S.B. Doty, K.W. Jones, H.W. Kraner, R.E. Shroy and A.L. Hanson **181** (1981) 159
PIXE analysis of environmental and biological samples using a proton microprobe, H.R. Wilde, W. Bischof, B. Raith, C.D. Uhlhorn and Gonsior **181** (1981) 165
The nuclear microprobe applied to bioenvironmental studies, U. Lindh **181** (1981) 171

Part VII. Analysis of thick samples

PIXE analysis of samples of intermediate thickness, L.-E. Carlsson, K.G. Malmqvist, G.I. Johansson and K.R. Akelsson **181** (1981) 179
A semiempirical procedure for the simple calculation of the signal intensity in PIXE analysis of thick samples, R.P.H. Garten, K.-O. Groeneveld and K.-H. König **181** (1981) 185
PIXE calibration and correction of matrix effects in the case of thick samples, F.-W. Richter and U. Wätjen . . **181** (1981) 189

Part VIII. External beam analysis

PIXE studies using a target chamber with helium atmosphere, E.T. Williams, H.L. Finston and P.M.S. Lesser **181** (1981) 195
PIXE analysis by means of an external proton beam, B. Raith, A. Stratmann, H.R. Wilde, B. Gonsior, S. Brüggerhoff and E. Jackwerth **181** (1981) 199
Analyses of inks and papers in historical documents through external beam PIXE techniques, T.A. Cahill, B. Kusko and R.N. Schwab **181** (1981) 205
Trace element analysis in biological materials by external beam PIXE, M. Khaliquzzaman, M.B. Zaman and A.H. Khan **181** (1981) 209

Part IX. Analysis of water and suspended particles

Trace elements in water in the Indo–Gangetic valley, K.M. Varier, G.K. Mehta and S. Sen **181** (1981) 217
A chelating agent – activated carbon – PIXE procedure for sub-ppb analysis of trace elements in water, E.-M. Johansson and K.R. Akelsson **181** (1981) 221
Analysis of elements in soluble and insoluble fractions of rain water by PIXE, Y. Hashimoto, Y. Osada, S. Tanaka, R. Chiba and H. Yokota **181** (1981) 227
Proton-induced X-ray emission analysis of marine particulates, W.C. Burnett and G.T. Mitchum **181** (1981) 231
Asbestos pollution assessment in river water by PIXE methods, S. Monaro, R. Lecomte, P. Paradis, S. Landsberger and G. Desaulniers **181** (1981) 239

Part X. Analysis of biological samples

Recent advances in paticle-induced X-ray emission analysis applied to biological samples, N.F. Mangelson and M.W. Hill **181** (1981) 243
Concentration measurements of micro- and macro-constituents in some biological materials, M. Budnar, V. Ramšak, M. Ravnikar, V. Valković and I. Orlić **181** (1981) 255
Comparison between PIXE and flame spectroscopy for trace analysis in human albumins, G. Deconninck, F. Bodart and E. Demoulin **181** (1981) 259
Analysis of trace elements in human hair by PIXE, G.B. Baptista, E.C. Montenegro, A.S. Paschoa and C.V. Barros Leite **181** (1981) 263
Trace element analysis of human hair by PIXE, Chen Jian-xin, Guo Yuan-zhuang, Li Hong-kou, Ren Chi-gang, Tang Guo-hun, Wang Xi-de, Yang Fu-chia and Yao Hui-ying **181** (1981) 269
PIXE studies of changes in mineral composition of plants infected with Phytophthora cinnamoni, M.A. Chaudhri, C.S. Papper and G. Weste **181** (1981) 275
Element analysis of a cell wall using PIXE, A. Jahnke, T. Shimmen, H. Koyama-Ito and T. Yamazaki **181** (1981) 279
PIXE studies of pollutants in plants, S. Szymczyk, J. Kajfosz, A.Z. Hrynkiewicz and J. Curzydlo **181** (1981) 281

Part XI. Analysis of medical samples

Optimization of PIXE sensitivity for biomedical applications, J.L. Campbell, S.B. Russel, S. Faiq, C.W. Schulte, R.W. Ollerhead and R.R. Gingerich **181** (1981) 285
On the bromide metabolism in uraemia, measured with PIXE, R.D. Vis, P.L. Oe, A.J.J. Bos and H. Verheul . . **181** (1981) 293
Multi-elemental X-ray analysis of normal and malignant mammalian tissue by proton excitation of thick samples in air, M.J. Renan, C.F. Albrecht and D.T.L. Jones **181** (1981) 297
Trace element analysis in rheumatoid arthritis under chrysotherapy, R. Lecomte, P. Paradis, S. Monaro, M. Barrette, G. Lamoureux and H.-A. Menard **181** (1981) 301

Whole blood analysis of kwashiorkor cases by PIXE, B. Spoelstra, J.P.F. Sellschop, H.J. Annegarn and M.J. Renan **181** (1981) 305
PIXE analysis of human serum – A preliminary study on the correlation between trace elements in human serum and the "Deficiency Syndrome Complex" theory of traditional Chinese medicine, Li Ming-chien, Tan Ming-guang, Chin Jun-fa, Shen Kang-long, Chen Zhi-xiang, Chang Jia-hua, Zhu Wen, Li Wei-yi, Xia Zong-qin and Kuang An-kun **181** (1981) 309
A PIXE method for investigating the time changes of halothane content during anaesthesia, J. Glazur, L. Jarcyk, E. Rokita, D. Słomińska, A. Strazałkowski and M. Sych **181** (1981) 315
Determination of circulating blood volume using PIXE, J. Glazur, L. Jarczyk, A. Macheta, E. Rokita, D. Słomińska, A. Strałkowski, M. Sych and M.A. Zajac **181** (1981) 319
PIXE analysis of caries related trace elements in tooth enamel, H.J. Annegarn, A. Jodaikin, P.E. Cleaton-Jones, J.P.F. Sellschop, C.C.P. Madiba and D. Bibby **181** (1981) 323
The influence of trace elements on fluoride uptake by teeth, M.A. Chaudhri and A. Crawford **181** (1981) 327
Applications of PIXE to studies in dental and mental healths, M.A. Chaudhri and T. Ainsworth **181** (1981) 333
An application of PIXE in medicine: Legionnaires' disease, J.R. Chen **181** (1981) 337

Part XII. Aerosol applications

A. Aerosol characteristics at sources

Aerosol emission from forest and grassland burnings in the southern Amazon basin and central Brazil, A.C.D. Leslie **181** (1981) 345
Aerosol emissions near a coal gasification plant in the Kosovo region, Yugoslavia, L.C.S. Boueres and R.K. Patterson **181** (1981) 353
Fumarolic aerosols from Kilauea volcano, Hawaii, M. Darzi **181** (1981) 359

B. Natural ambient aerosols

Particulate matter and sulfur in the natural atmosphere, J.W. Winchester **181** (1981) 367
Light element composition of the atmospheric aerosol at Cape Grim (Tasmania) and Townsville (Queensland) by PIXE and PESA, M.O. Andreae and W.R. Barnard **181** (1981) 383
Nonurban aerosol composition near Beijing, China, J.W. Winchester, Wang Ming-xing, Ren Li-xin, Lu Wei-xiu, H.-C. hansson, H. Lannefors, M. Darzi and A.C.D. Leslie **181** (1981) 391
PIXE analysis of aerosol samples collected over the Atlantic Ocean from a sailboat, W. Maenhaut, A. Selen, P. van Espen, R. van Grieken and J.W. Winchester **181** (1981) 399
Regional scale synoptic air monitoring for visibility evaluation based on PIXE analyses, R.G. Flocchini, T.A. Cahill, L.L. Ashbaugh, R.A. Eldred, P.J. Feeney and D. Shadoan **181** (1981) 407

C. Urban aerosols

Sulfur in aerosol versus wind direction in New York City and a nearby rural site, S.E. Bauman, R. Ferek, E.T. Williams and H.L. Finston **181** (1981) 411
Fine and coarse elemental components in the urban aerosol of São Paulo, Brazil, L.C.S. Bouéres and C.M.Q. Orsini **181** (1981) 417
PIXE investigation of element concentration and particle size distribution in Milan atmospheric aerosol, E. Caruso, G.M. Braga Marcazzan and P. Redealli **181** (1981) 425
Time dependence of the elemental composition of atmospheric aerosols over a time period of 12 years, P. Metternich, R. Latz, J. Schader, H.W. Georgii, K.O. Groeneveld and A. Wensel **181** (1981) 431
PIXE analysis of time-sequence "streaker" filters from Johannesburg, H.J. Annegarn, C.C.P. Madiba, J.W. winchester, S. Bauman and J.P.F. Sellschop **181** (1981) 435
Indoor/outdoor elemental concentration relationships at a nursery school, H. Lannefors and H.-C. Hansson . **181** (1981) 441
Vertical distribution of particulate trace elements in a street canyon determined by PIXE analysis, T. Raunemaa, A. Hautojärvi, K. Kaisla and M. Gerlander **181** (1981) 445

D. Work environment aerosols

Combined PIXE and X-ray SEM studies on time-resolved deposits of welding shop aerosols, K.M. Barfoot, I.V. Mitchell, F. Verheyen and T. Babeliowsky **181** (1981) 449
MeV protons for the characterization of aerosols in work environments, M. Bohgard, K.G. Malmqvist, G.I. Johansson and K.R. Akselsson **181** (1981) 459
Elemental concentrations in airborne particles from welding and metal spraying operations, K.G. Malmqvist, G.I. Johansson, M. Bohgard and K.R. Akselsson **181** (1981) 465

E. Tests and applications of samplers

Innovative aerosol sampling devices based upon PIXE capabilities, T.A. Cahill **181** (1981) 473
A two-stage "discrete streaker" compatible with high volume samplers, K. Kemp and J. Tscherning Møller . . **181** (1981) 481
The measurement of large-volume air-particulate samplers by PIXE analysis, D.W. Mingay, C.M. Vleggaar and J.L. Watkins **181** (1981) 487
Aerosol deposition characteristics of a cascade impactor obtained by PIXE analysis, H. Jupe, F.-W. Richter and U. Wätjen **181** (1981) 493
Cascade impacter aerosol samples for PIXE and PESA analyses, S. Bauman, P.D. Houmere and J.W. Nelson . **181** (1981) 499
Above ground characterization utilizing PIXE analysis and airborne samplers, D.J. Shadoan, J.B. Barone and T.A. Cahill **181** (1981) 503
Sampling method and PIXE analysis for atmospheric sulfur dioxide with alkali coated filters, S. Tanaka, Y. Hashimoto, M. Darzi and J.W. Winchester **181** (1981) 509

Part XIII. Miscellaneous applications

Application of the proton induced X-ray emission (PIXE) technique to the study of problems in forensic science, S. Sen, K.M. Varier, G.K. Mehta, M.S. Rao, P. Sen and N. Panigrahi **181** (1981) 517
Multi-elemental analysis of lubricating oil, B. Babinski, M. Cocłowski, M. Jaskóła, M. Kucharski and L. Zemło **181** (1981) 523
PIXE analysis of ancient Jordanian pottery, N. Saleh, L.-E. Carlsson, A.B. Hallak and C. Bennet **181** (1981) 527
Rapid determination of major and trace elements in geological material with proton-induced X-ray and gamma-ray emission, L.-E. Carlsson and K.R. Akselsson **181** (1981) 531

Proceedings of the 2nd International Conference on Ion Beam Modification of Materials
Albany, N.Y., July 14 – 18 1980

Section I. Cascades, recoil phenomena and ranges

Ion-beam-induced reactions in metal–semiconductor and metal–metal thin film structures, J.W. Mayer, B.Y. Tsaur, S.S. Lau and L.S. Hung **182/183** (1981) 1
Implantation and ion beam mixing in thin film analysis, P. Williams and J.E. Baker **182/183** (1981) 15
Theoretical aspects of atomic mixing by ion beams, P. Sigmund and A. Grass-Marti **182/183** (1981) 25
Ion beam mixing in amorphous silicon, I. Experimental investigation, S. Matteson, B.M. Paine, M.G. Grimaldi, G. Mezey and M.-A. Nicolet **182/183** (1981) 43
Ion beam mixing in amorphous silicon. II. Theoretical interpretation, S. Matteson, B.M. Paine and M.-A. Nicolet **182/183** (1981) 53
Dynamic surface composition changes in binary alloys under ion bombardment, G. Betz, M. Opitz and P. Braun **182/183** (1981) 63
Microalloying by ion-beam mixing, B.Y. Tsaur, S.S. Lau, L.S. Hung and J.W. Mayer **182/183** (1981) 67
Effects of cascade energy density on radiation induced segregation and ion beam mixing, R.S. Averback, L.E. Rehn, P.R. Okamoto and R.E. Cook **182/183** (1981) 79
Recoil implantation of antimony into silicon, A. Grob, J.J. Grob, N. Mesli, D. Salles and P. Siffert **182/183** (1981) 85
Recoil implantation of antimony in silicon, M. Bruel, M. Floccari and J.P. Gailliard **182/183** (1981) 93
Ion-beam mixing of metal–semiconductor eutectic systems, SS. Lau, B.Y. Tsaur, M. von Allmen, J.W. Mayer, B. Stritzker, C.W. White and B. Appleton **182/183** (1981) 97
Ion bombardment induced interface mixing in the Ag–Si system, N.P. Tognetti, R.P. Webb, C.E. Christodoulides, D.G. Armour and G. Carter **182/183** (1981) 107
Comparison of ion beam mixing at room temperature and 40 K, B.M. Paine, M.-A. Nicolet, R.G. Newcombe and D.A. Thompson **182/183** (1981) 115
Segregation-assisted recoil implantation, A.D. Marwick and R.C. Piller **182/183** (1981) 121
A new recoil implantation in Si using electron bombardment, T. Wada and M. Kaneiwa **182/183** (1981) 131
Recoil implantation of oxygen from SiO_2 thin films on silicon, B. Villepelet, F. Ferrieu, A. Grouillet, A. Golanski, J.P. Gailliard and E. Ligeon **182/183** (1981) 137
Features of collision cascades in silicon as determined by transmission electron microscopy, L.M. Howe and M.H. Rainville **182/183** (1981) 143
Study of displacement cascades in metals by means of component analysis, M. Hou **182/183** (1981) 153
Bulk and surface ion–electron emission at the Curie point from nickel, W. Soszka and T. Stępień **182/183** (1981) 163

Velocity distribution of sputtered U atoms as determined by laser induced fluorescence spectroscopy, R.B. WRIGHT, M.J. PELLIN and D.M GRUEN **182/183** (1981) 167
Sputtering observations during binary alloy production by ion implantation, G.W. REYNOLDS, A.R. KNUDSON and C.R. GOSSETT **182/183** (1981) 179
Recoil range distributions in multilayered targets, L.A. CHRISTEL, J.F. GIBBONS and S. MYLROYE **182/183** (1981) 187
Calculation of projected ranges – analytical solutions and a simple general algorithm, J.P. BIERSACK **182/183** (1981) 199
On the kinetic energies of sputtered excited particles. III. Recoil sputtering as a source of high-energy particles, S. DZIOBA and R. KELLY **182/183** (1981) 207
Oxygen and implanted ion profiles in oxidized zirconium, M. BERTI, A. CARNERA, A.V. DRIGO, A. ARMIGLIATO, A. DESALVO and R. ROSA **182/183** (1981) 215
Description of arsenic and boron profiles implanted in SiO_2, Si_3N_4 and Si using Pearson distributions with four moments, F. JAHNEL, H. RYSSEL, G. PRINKE, K. HOFFMANN, K. MÜLLER, J. BIERSACK and R. HENKELMANN . **182/183** (1981) 223
Concentration profiles of chromium and nickel implanted in pure iron, Y. OKABE, M. IWAKI, S. NAMBA and K. YOSHIDA **182/183** (1981) 231
Ion-beam-induced atomic mixing at the SiO_2/Si interface, I.S.T. TSONG, J.R. MONKOWSKI and D.W. HOFFMAN . **182/183** (1981) 237

Section II. Material build-up and removal processes

Low-energy mass-separated ion beam deposition of materials, T. TOKUYAMA, K. YAGI, K. MIYAKE, M. TAMURA, N. NATSUAKI and S. TACHI **182/183** (1981) 241
Simultaneous ion implantation and deposition, L. PRANEVIČIUS **182/183** (1981) 251
Low energy ion bombardment during crystal growth and its effect on structure, composition and physical properties, E. KAY **182/183** (1981) 259
Cd depletion in ion implanted thin film CdSe, P.J. SCANLON, F.R. SHEPHERD **182/183** (1981) 261
On the role of the primary beam and of scattered or sputtered particles in the faceting of cones on bombarded surfaces, O. AUCIELLO and R. KELLY **182/183** (1981) 267
Theory of redeposition of sputtered flux on to surface asperities, J. BELSON and I.H. WILSON **182/183** (1981) 275
Surface impurity loss during MeV $^{14}N^+$ ion bombardment, F. PÁSZTI, G. MEZEY, E. KÓTAI, T. LOHNER, A. MANUABA, J. GYULAI and L. PÓCS **182/183** (1981) 283
The influence of target structure on topographical features produced by ion beam sputtering, J.L. WHITTON and W.A. GRANT **182/183** (1981) 287
The repetitive flaking of Inconel 625 by 100 keV helium ion bombardment, J.L. WHITTON,H.M. CHEN, U. LITTMARK and B. EMMOTH **182/183** (1981) 291
Carbon buildup by ion-induced polymerization under 100–400 keV H, He, and Li bombardment, W. MÖLLER, TH. PFEIFFER and M. SCHLUCKEBIER **182/183** (1981) 297
Formation of epitaxial NiO by oxygen implantation in [100] Ni, M.M. TOŠIĆ, A.V. DRIGO, C. COHEN, L. THOME, J. CHAUMONT, H. BERNAS and A. CARNERA **182/183** (1981) 303
MeV helium erosion yield of nitrogen frozen gas, V. PIRRONELLO, G. STRAZZULLA, G. FOTI and E. RIMINI **182/183** (1981) 315
Analysis of ion bombardment cylindrical geometry solids, T. NENADOVIĆ, N. BIBIĆ, B. MECKEL and M. MILOSAVLJEVIĆ **182/183** (1981) 319

Section III. Non-equilibrium phases

Non-equilibrium structures in ion-implanted metals, E.N. KAUFMANN and L. BUENE **182/183** (1981) 327
Hydrogen in amorphous silicon, P.S. PEERCY **182/183** (1981) 337
Phase changes in insulators produced by particle bombardment, R. KELLY **182/183** (1981) 351
Small-angle X-ray scattering study of precipitation in aluminum–zinc implanted alloys, J. DELAFOND, A. NAUDON and C. TEMPLIER **182/183** (1981) 379
Crystallographic transformation and lifetime of thin carbon foils under ion and laser irradiation, H.H. BUKOW, B. GROSSE-KREUL and U. SANDER **182/183** (1981) 383
Limits to solid solubility in ion implanted silicon, J.S. WILLIAMS and R.G. ELLIMAN **182/183** (1981) 389
Evidence of new phase creation in implanted TiO_2, M. GUERMAZI, P. THEVENARD, J.P. DUPIN and C.H.S. DUPUY **182/183** (1981) 397
Mössbauer study of the amorphous layer in ion implanted diamond, M. VAN ROSSUM, G. LANGOUCHE, J. DE BRUYN, M. DE POTTER and R. COUSSEMENT **182/183** (1981) 407

Section IV. Defects

Defect trapping of gas atoms in metals, S.T. PICRAUX **182/183** (1981) 413
Defects in metals studied by implanted radioactive atoms, E. RECKNAGEL and TH. WICHERT **182/183** (1981) 439
Ion-induced defects in semiconductors, J.W. CORBETT, J.P. KARINS and T.Y. TAN **182/183** (1981) 457

Direct observations of the primary state of radiation damage of ion-irradiated tungsten and platinum, D.N. SEIDMAN, M.I. CURRENT, D. PRAMANIK and C.-Y. WEI ... **182/183** (1981) 477
Amorphous clusters associated with recoil oxygen created in As^+ ion-implanted Si/SiO_2 systems, T. IZUMI, T. MATSUMORI, T. HIRAO, Y. YAEGASHI, G. HUSE and K. INOUE ... **182/183** (1981) 483
Implantation rate effects on microstructure, W.J. CHOYKE, J.A. SPITZNAGEL, S. WOOD, N.J. DOYLE, J.N. MCGRUER and J.R. TOWNSEND ... **182/183** (1981) 489
Ion implantation damage produced by 100 keV Ar^+ ions in Fe 40 at.% Al and Fe–Co–2V ordered alloys, J.P. RIVIÈRE, J.F. DINHUT and J. DELAFOND ... **182/183** (1981) 495
X-ray study of the defect structure in ion implanted niobium and molybdenum superconductors, G. LINKER ... **182/183** (1981) 501
Annealing behaviour of particle irradiated molybdenum foils, A. WEIDINGER, R. WESSNER, E. RECKNAGEL and TH. WICHERT ... **182/183** (1981) 509
Recovery of radiation damage in platinum, studied by Mössbauer spectroscopy, E. VERBIEST, H. PATTYN and J. ODEURS ... **182/183** (1981) 515
Modification of near-surface precipitation in Al–Ge alloy by ion irradiation, K.L. RUSBRIDGE ... **182/183** (1981) 521
Nitrogen distribution and nitride precipitation in $^{14}N^+$ ion implanted 304 and 316 steels, M. BARON, A.L. CHANG, J. SCHREURS and R. KOSSOWSKY ... **182/183** (1981) 531
TEM study of bubble-evolution related to the absence of a second generation of blisters in low energy He bombarded Nb, R.G. SAINT-JACQUES and G. VEILLEUX ... **182/183** (1981) 539

Section V. Ion-implanted semiconductors

Shallow implanted layers in advanced silicon devices, J.M. SHANNON ... **182/183** (1981) 545
The electrical characteristics of ion implanted compound semiconductors, J.P. DONNELLY ... **182/183** (1981) 553
Post-implantation processes in semiconductors, G. FOTI ... **182/183** (1981) 573
Electrical and physical analysis of indium implanted (111) silicon, R.G. ELLIMAN, H.B. HARRISON and D.G. BEANLAND ... **182/183** (1981) 581
High-dose Ge implantation into ⟨100⟩ Si, G. MEZEY, S.M. MATTESON and J. GYULAI ... **182/183** (1981) 587
Ellipsometric and channeling studies on ion-implanted silicon, T. LOHNER, G. MEZEY, E. KÓTAI, F. PÁSZTI, L. KIRÁLYHIDI, G. VÁLYI and J. GYULAI ... **182/183** (1981) 591
Reflectance of silicon surfaces after high dose rate molecular ion implantation, M.O. LAMPERT, M. HAGE-ALI, J.C. MULLER, M. TOULEMONDE and P. SIFFERT ... **182/183** (1981) 595
A graphical method to obtain the implantation regime required for heavily doped deep semiconductor junctions, B. RAICU ... **182/183** (1981) 601
Electronic transport in ion-bombarded amorphous silicon, R. PFEILSTICKER, S. KALBITZER and G. MÜLLER ... **182/183** (1981) 603
Comparative studies of Mg implants in GaAs in different annealing environments, Y.K. YEO, Y.S. PARK and BYUNG DOO CHOE ... **182/183** (1981) 609
Dual implantation and amphoteric behavior of Ge implants in GaAs, Y.S. PARK, Y.K. YEO and F.L. PEDROTTI ... **182/183** (1981) 617
Effect of dual implantation on the amphoteric behavior of group IV ion implanted GaAs, H. KRÄUTLE ... **182/183** (1981) 625
Electrical properties and atomic distribution studies in ion implanted InP, K.V. VAIDYANATHAN, C.L. ANDERSON, H.L. DUNLAP and D.E. HOLMES ... **182/183** (1981) 631
Molecular effect in the expansion of ion implanted InSb, G.L. DESTEFANIS, J.P. BELLE, J.M. OGIER-COLLIN and J.P. GAILLIARD ... **182/183** (1981) 637
Ion implantation in indium phosphide, T. INADA, S. TAKA and T. HARA ... **182/183** (1981) 641
Zinc implantation in gallium phosphide, Y. OHNUKI and T. INADA ... **182/183** (1981) 647
Modification of nickel silicide formation by oxygen implantation, D.M. SCOTT and M.-A. NICOLET ... **182/183** (1981) 655
Retardation and suppression of nickel silicide formation by N^+ implantation, D.M. SCOTT, L. WIELUŃSKI, H. VON SEEFELD and M.-A. NICOLET ... **182/183** (1981) 661
Thermal oxidation of ion implanted silicon, J.S. WILLIAMS and C.E. CHRISTODOULIDES ... **182/183** (1981) 667
Furnace and cw Ar laser induced solid-phase epitaxial regrowth of SOS films implanted with Si, Si + B, P, and P + B ions, I. GOLECKI, G. KINOSHITA and B.M. PAINE ... **182/183** (1981) 675
Crystalline quality improvement of SOS films by Si implantation and subsequent annealing, T. INOUE and T. YOSHII ... **182/183** (1981) 683
Channelling analysis of high temperature ion-implanted diamond, G. BRAUNSTEIN and R. KALISH ... **182/183** (1981) 691
Deep levels in implanted, pulse-layer-annealed GaAs, Y. YUBA, K. GAMO, A.H. ORABY, K. MURAKAMI and S. NAMBA ... **182/183** (1981) 699
Ion implanted cathode doping notches in GaAs Gunn material, A. EZIS, D.V. MORGAN and M.J. HOWES ... **182/183** (1981) 705
Selenium implantation in epitaxial gallium arsenide layers, T. INADA, K. TOKUNAGA, S. TAKA, Y. YUGE and H. KOHZU ... **182/183** (1981) 709
Optical and electrical properties of disordered layers in GaAs crystals produced by Si^+-ion implantation, S. SHIGETOMI and T. MATSUMORI ... **182/183** (1981) 719

Section VI. Ion-implanted insulators

Ion implantation in insulators, P.D. Townsend ... **182/183** (1981) 727
Ion-implantation-induced phase separation and crystallization in lithia–silica glasses, G.W. Arnold, P.S. Peercy and B.L. Doyle ... **182/183** (1981) 733
Ion implantation effects in insulators and the long-term stability of radioactive waste storage materials, J.C. Dran, Y. Langevin, M. Maurette, J.C. Petit and B. Vassent ... **182/183** (1981) 741
Spinel ferrite formation in iron implanted MgO crystals, A. Perez, M. Treilleux, L. Fritsch and G. Marest ... **182/183** (1981) 747
Insulator–metal transition induced by ion implantation in LiF, J. Davenas and C. Dupuy ... **182/183** (1981) 753
Surface acoustic waves in the study of ion implanted surface layers, S. Joneliunas, L. Pranevichius and R. Valatka ... **182/183** (1981) 761
Transport study of Li-implanted NiO single crystal films, R.E. Benenson, V. Tikku, M.G. Brown, J. Savi and R.K. Maccrone ... **182/183** (1981) 769
Radiation damage and refractive index of ion-implanted $LiNbO_3$, H. Karge, G. Götz, U. Jahn and S. Schmidt ... **182/183** (1981) 777
Luminescence during ion implantation of silica, F. Jaque and P.D. Townsend ... **182/183** (1981) 781
Optical image storage in ion implanted PLZT ceramics, P.S. Peercy and C.E. Land ... **182/183** (1981) 787
Depth analysis by RBS of ion-exchanged optical waveguides, J. O'Connor, D.W. Palmer, P.D. Townsend, J. Morris, C.W. Pitt, Z. Neuman and L.M. Walpita ... **182/183** (1981) 797
Mössbauer spectroscopy study of ^{57}Fe implanted in simple ionic crystals, J. Stanek, J. Kowalski, B.D. Sawicka and J.A. Sawicki ... **182/183** (1981) 801

Section VII. Ion-implanted metals

Ion-implantation and irradiation studies using amorphous metals, W.A. Grant ... **182/183** (1981) 809
Solute segregation and precipitate stability in irradiated alloys, A.D. Marwick ... **182/183** (1981) 827
Structural and electronic properties of ion implanted superconductors, H. Bernas and P. Nedellec ... **182/183** (1981) 845
Modification of metallic corrosion by ion implantation, C.R. Clayton ... **182/183** (1981) 865
Ion implantation and catalysis: electrochemical applications of ion implantation, G.K. Wolf ... **182/183** (1981) 875
Surface mechanical properties – effects of ion implantation, H. Herman ... **182/183** (1981) 887
The alteration of oxidation and related properties of metals by ion implantation, G. Dearnaley ... **182/183** (1981) 899
Some experimental studies on metal implantation, H.T. Li, P.S. Liu, S.C. Chang, H.C. Lü, H.H. Wang and K. Tao ... **182/183** (1981) 915
Some measurements of hardness, wear and stresses in ion implanted thin metallic films, J.Y. Robic, J. Piaguet and J.P. Gailliard ... **182/183** (1981) 919
Friction behavior of 52100 steel modified by ion implanted Ti, I.L. Singer, C.A. Carosella and J.R. Reed ... **182/183** (1981) 923
H and D implantation transforms Ti, Zr and Hr into good superconductors, J.D. Meyer and B. Stritzker ... **182/183** (1981) 933
Low-temperature H-ion implantation in aluminum, S.T. Sekula and J.R. Thompson ... **182/183** (1981) 937
Change of superconducting properties of indium-films by low temperature irradiation, A. Hofmann, P. Ziemann and W. Buckel ... **182/183** (1981) 943
The effect of ion implantation on the fatigue properties of polycrystalline copper, A. Kujore, S.B. Chakrabortty, E.A. Starke, Jr. and K.O. Legg ... **182/183** (1981) 949
Modification of the fatigue behavior of copper and stainless steel by ion implantation, H. Bakhru, W. Gibson, C. Burr, A.J. Kumnick and G.E. Welsch ... **182/183** (1981) 959
Production of metastable simple cubic Te–Au alloys by ion irradiation, J.D. Meyer and B. Stritzker ... **182/183** (1981) 965
Search for superconductivity in ion-implanted Pd–Ge films, F.C. Zawislak, H. Bernas, L. Mendoza-Zelis, A. Traverse, J. Chaumont and L. Dumoulin ... **182/183** (1981) 969
He trapping and bubble formation in Ni, stainless steel 316 and amorphous alloys, W. Jäger and J. Roth ... **182/183** (1981) 975
Effect of ion implantation on the oxygen overpotential of Ni anodes, U. Akano, J.A. Davies, W.W. Smeltzer, I.S. Tashlykov and D.A. Thompson ... **182/183** (1981) 985
Evidence of surface migration and formation of catalytically "inactive" Pt in corrosion studies of Pt^+ implanted Ti, B.R. Appleton, E.J. Kelly, C.W. White, N.G. Thompson and B.D. Lichter ... **182/183** (1981) 991
Electrochemical and corrosion behaviour of nitrogen and boron implanted ARMCO iron, P.L. Bonora, M. Bassoli, G. Cerisola, P.L. De Anna, S. Lo Russo, P. Mazzoldi, I. Scotoni, C. Tosello and A. Bernard **182/183** (1981) 1001
Electrochemical properties of ion-implanted metal electrodes, K. Takahashi, Y. Okabe and M. Iwaki ... **182/183** (1981) 1009
Trapping site location for Sb in Fe–Ti–Sb–C alloys, J.A. Knapp and D.M. Follstaedt ... **182/183** (1981) 1017
Sb interactions with TaC precipitates and Cu in ion-implanted α-Fe, D.M. Follstaedt and S.M. Myers ... **182/183** (1981) 1023
Evidence for ordered metal hydride production by low temperature ion implantation, H. Bernas, A. Traverse, L. Brossard, J. Chaumont, F. Lalu and L. Dumoulin ... **182/183** (1981) 1033
Properties of iron implanted microalloys correlated with atomic volumes and with Miedema model for alloying, B.D. Sawicka ... **182/183** (1981) 1039

Gamma transmission gauge for assay of integral water content in soil, A. Fishman, A. Notea and Y. Segal ... **184** (1981) 571
Humidity measurements using a double ionization chamber with γ-rays (*Letter to the Editor*), S. Matsumoto and H. Kobayashi ... **184** (1981) 603
Experimental study of the enhanced ion backscattering yield at 180° and its depth dependence, J.A. Moore, T.E. Jackman, J.A. Davies and W. Eckstein ... **185** (1981) 459
Current techniques in muon spin rotation experiments, W.F. Lankford, K.G. Lynn, W.J. Kossler, A.T. Fiory, R.P. Minnich and C.E. Stronach ... **185** (1981) 469
A large area position sensitive neutron detector, R. Berliner, D.F.R. Mildner, O.A. Pringle and J.S. King ... **185** (1981) 481
Polarized neutron set-up for experimental study of the neutron nucler precession, M.I. Tsulaya, M.S. Gabelya, S.I. Djamaspishvili, L. Dobrzyński, K. Blinowski and L. Chelmicki ... **185** (1981) 497
Prompt ion-induced autoradiography and its application for the determination of deuterium, R. Ilić and C. Altstetter ... **185** (1981) 505
Water impurity investigation using proton induced X-ray emission, Cheng-ming Fou ... **186** (1981) 599
Semiempirical method of slow neutron flux calculation for neutron gauging, D. Ingman and E. Taviv ... **186** (1981) 605
The multistep avalanche chamber as a detector for thermal neutrons, G. Melchart, G. Charpak, F. Sauli, G. Petersen and J. Jacobé ... **186** (1981) 613
A photographic method for neutron small-angle scattering, A.J. Allen and D.K. Ross ... **186** (1981) 621
Design of microcomputer-based data acquisition system for the time-of-flight ion scattering spectrometer, Hao-yung Lo and Ching-shen Su ... **186** (1981) 637
Application of muonic X-ray techniques to the elemental analysis of archeological objects, E. Köhler, R. Bergmann, H. Daniel, P. Ehrhart and F.J. Hartmann ... **187** (1981) 563
Target charging in PIXE analysis, J.B.A.D. van Zon, H.P.M. Kivits and J.A. van der Heide ... **187** (1981) 569
Hydrogen mobility under beam impact when using the ^{1}H (^{15}N, $\alpha\gamma$) nuclear reaction for material analysis, J.P. Thomas, M. Fallavier and J. Tousset ... **187** (1981) 573
An accurate calculation of the 511 keV line background in positron annihilation Doppler broadening studies, I. Chaglar, P. Rise-Evans, F.A.R. El Khangi and A.A. Berry ... **187** (1981) 581
Spectral measurements of neutrons produced by 52 MeV protons with activation detectors, K. Shin, T. Saito, M. Fujii and T. Nakamura ... **187** (1981) 587
Ion-implanted and bakeable silicon detectors, A. Hyder ... **187** (1981) 595
Detection mechanisms in silicon diodes used as α-particle and thermal neutron detectors, G.F. Cerofolini, G. Ferla and A. Foglio Para ... **187** (1981) 599
The proper distance of a two-detector arrangement for activity determination of γ-ray emitting samples (*Letter to the Editor*), R. Hollnagel and K. Knauf ... **187** (1981) 653
An automated scanning ion microbeam system, L.F. Requicha Ferreira and J.M. Calvert ... **188** (1981) 177
The use of the neutron induced reaction for boron profiling in Si, J. Červená, V. Hňatowicz, J. Hoffmann, Z. Kosina, J. Kvítek and P. Onheiser ... **188** (1981) 185
Quantitative analysis of difference Mössbauer spectra, E. Ratner and M. Ron ... **188** (1981) 191
The thickness distortion of ^{57}Fe backscatter Mössbauer spectra, B. Fultz and J.W. Morris Jr. ... **188** (1981) 197
Preliminary investigations of trace element concentrations in human teeth, D.D. Cohen, E. Clayton and T. Ainsworth ... **188** (1981) 203
Foil non-uniformity correction in straggling measurements by the backscattering technique (*Letter to the Editor*), J.P. Stoquert, J.C. Oberlin, C. Heitz, J. Cailleret and G. Lagarde ... **188** (1981) 249
Use of ^{71}Ge source for thickness measurement of iron films (*Letter to the Editor*), K. Saneyoshi, J. Itho, T. Toriyama and K. Hisatake ... **188** (1981) 253
Amélioration de l'émittance du duoplasmatron par la réduction de la pression dans la cuvette d'expansion (*Letter to the Editor*), J. Aubert, C. Lejeune et P. Nugues ... **188** (1981) 257
Ultra-thin laser-aided doped Li contacts on high-purity germanium nuclear radiation detectors (*Letter to the Editor*), S.J. Pearton and A.A. Williams ... **188** (1981) 261
Sum peak formation in neutron damaged Ge(Li) detectors; a method to identify damaged crystals (*Letter to the Editor*), I. Török ... **188** (1981) 265
An instrument for lattice location studies of light impurity atoms by means of (n, α)-reactions, J.P. Biersack, D. Fink, J. Lauch, R. Henkelmann and K. Müller ... **188** (1981) 411
Etude de la fixation d'atomes de brome dans les traces latentes d'ions, J.C. Varielle, J.P. Moliton, J.L. Deocssas, J.L. Teyssier et B. Delaunay ... **188** (1981) 421
Determination of the ash content of coal using annihilation radiation, B.D. Sowerby and V.N. Ngo ... **188** (1981) 429
On-line neutron capture gamma analysis with a Ge detector, S. Uusitalo and T. Lukander ... **188** (1981) 439
An evaluation of CdTe surface barrier diodes as detectors for energetic charged particles, R.A. Ristinen, R.J. Peterson, J.J. Hamill, F.D. Becchetti and G. Entine ... **188** (1981) 445
Transmission Mössbauer polarizer (*Letter to the Editor*), D. Barb, M. Rogalski and T. Bibicu ... **188** (1981) 469
On the detection of low energy γ-rays with plastic scintillators (*Letter to the Editor*), M. Caria, P. Macciotta and S. Serci ... **188** (1981) 473

The prompt gamma neutron activation analysis facility at MURR, A.G. Hanna, R.M. Brugger and M.D. Glascock . . . **188** (1981) 619
A liquid xenon position sensitive gamma-ray detector for positron annihilation experiments, K. Masuda, T. Doke and T. Takahashi . . . **188** (1981) 629
Nuclear track determination of lithium and boron in various matrices, L.J. Pilione and B.S. Carpenter . . . **188** (1981) 639
An ionization chamber and a Si-detector for lead-210 chronology, M.F.A.F. El-Daoushy . . . **188** (1981) 647
Neutron detection with ^{3}He–Xe proportional scintillation detector (*Letter to the Editor*), H. Nguyen Ngoc, J. Jeanjean, J. Jacobe and P. Mine . . . **188** (1981) 677

Proceedings of the Third International Conference on Ion Implantation Equipment and Techniques

Queen's University, Kingston, Ontario, 8–11 July 1980

Part I. Plenary session

Historical perspective and future trends for ion implantation systems, L. Wegmann . . . **189** (1981) 1

Part II. Ion sources and beam optics

Beam optics design for ion implantation, J.H. Keller . . . **189** (1981) 7
Aspects of the physics, chemistry, and technology of high intensity heavy ion sources, G.D. Alton . . . **189** (1981) 15
Magnet optics for beam transport, H.F. Glavish . . . **189** (1981) 43
Ion extraction and optics arithmetic, J.H. Whealton . . . **189** (1981) 55
Electrostatic ion optics and beam transport for ion implantation, J.D. Larson . . . **189** (1981) 71
Electrical rotation of quadrupole lenses, F.W. Martin . . . **189** (1981) 93
First results with ELSIRE – a reflex ion source for singly charged heavy ions, R. Keller . . . **189** (1981) 97
Production of high-current metal ion beams, J.K. Hirvonen, C.A. Carosella and G.K. Hubler . . . **189** (1981) 103
The Frankfurt PIG ion source, H. Baumann and K. Bethge . . . **189** (1981) 107
Advances in molten metal field ion sources, R. Clampitt . . . **189** (1981) 111

Part III. Temperature controlled implants and special techniques

Techniques and equipment for non-semiconductor applications of ion implantation, G. Dearnaley and P.D. Goode . . . **189** (1981) 117
Stimulation of low energy (shallow) implants using target tilt, D.G. Beanland, L. de Cata, H.B. Harrison, J.S. Williams and A. Zylewicz . . . **189** (1981) 133
New techniques of implantation for near-term applictions, M. Bruel, M. Floccari, J. Labartino, J.F. Michaud and A. Soubie . . . **189** (1981) 135
Cryostat for ion implantation into insulators at low temperatures, K. Rössler, A. Cavallero and M. Vogt . . . **189** (1981) 141
Low temperature irradiation equipment for measurements down to 150 mK, W. Bauriedl, G. Heim, M. Hitzfield, P. Ziemann and W. Buckel . . . **189** (1981) 145
Fast target heating system for ion implantation, H. Kräutle . . . **189** (1981) 151
Comparison between properties of steels implanted with unseparated ions and a selected ion, M. Iwaki, Y. Okabe, S. Namba and K. Yoshida . . . **189** (1981) 155
The influence of ion implantation parameters on the surface modification of steels, P.D. Goode and I.J.R. Baumvol . . . **189** (1981) 161
Experiments on gas cooling of wafers, M. King and P.H. Rose . . . **189** (1981) 169

Part IV. Systems, controls and instrumentation

Ion implantation in semiconductor processing, S. Namba . . . **189** (1981) 175
Control techniques for a high current ion implantation system, E.H. Bayer, J.I. Granlund and L.F. Paul . . . **189** (1981) 183
Manufacturing advantages for remote control of medium current ion implant systems, R.L. Marsh and H. von Burg . . . **189** (1981) 187
A medium energy facility for variable temperature implantation and analysis, J. Chaumont, F. Lalu, M. Salome, A.-M. Lamoise and H. Bernas . . . **189** (1981) 193
An ion accelerator facility for the preparation of nuclear bombardment targets, G.W. Grime and J. Takacs . . . **189** (1981) 199
Low cost molecular ion implantation equipment, J.C. Muller and P. Siffert . . . **189** (1981) 205
In situ implantation system in Argonne National Laboratory HVEM-tandem facility, A. Taylor, J.R. Wallace, E.A. Ryan, A. Philippides and J.R. Wrobel . . . **189** (1981) 211
Pulsed CV system for ion implantation control, G.E. Schmid . . . **189** (1981) 219

Part V. Target chambers, scanning and dosimetry

Electromagnetic scanning systems, P.R. HANLEY **189** (1981) 227
Target chambers for ion implantation using mechanical scanning, G. RYDING **189** (1981) 239
Dosimetry measurement in ion implanters, D.M. JAMBA **189** (1981) 253
Post-implant methods for characterizing the doping uniformity and dose accuracy of ion implantation equipment, J.N. GAN and D.S. PERLOFF **189** (1981) 265
A microprocessor-based beam sweep control unit, R. CONRAD and P. MERTENS **189** (1981) 275
Some considerations on target chamber design, R.J. STOKER **189** (1981) 281
Equipment for accurate ion collection of high areal uniformity, W.H. GRIES **189** (1981) 287
Correlation between electrostatic scan pattern and local dose nonuniformities, H. GLAWISCHNIG, K. HOERSCHELMANN, W. HOLTSCHMIDT and W. WENZIG **189** (1981) 291
A new dose control technique for ion implantation, G. RYDING and M. FARLEY **189** (1981) 295
Optimal selection of sweep frequencies in ion implantation systems with $X-Y$ scanning, E.J. ROGERS **189** (1981) 305
Improved uniformity of implanted dose by a compensated scan pattern generator, N. TURNER **189** (1981) 311
A high-throughput mechanically scanned target chamber, G. RYDING and A. ARMSTRONG **189** (1981) 319

Part VI. Papers submitted but not presented

Technique to study simultaneous deposition and ion implantation, R. NAUJOKAITIS, L. PRANEVICIUS and S. RAILA **189** (1981) 327
Design and fabrication of a simulation chamber, S. KUMAR AGRAWAL, U. KUMAR and A. KUMAR NIGAM **189** (1981) 331
A duoplasmatron ion source for solid materials such as As and P, ZHONG BO-LI and YAN HENG-DI **189** (1981) 335

A high resolution spectrometer used in MeV heavy ion backscattering analysis, A. CHEVARIER, N. CHEVARIER and S. CHIODELLI **189** (1981) 525
An investigation of methods to reduce the hydrogen concentration on surfaces useful for ultra-cold neutron storage, P.H. LA MARCHE, W.A. LANFORD and R. GOLUB **189** (1981) 533
Fast inversion of neutron spin, G. BADUREK **189** (1981) 543
On the thermal neutron scattering from polycrystalline vanadium, J.R. GRANADA, F. KROFF and R.E. MAYER . . **189** (1981) 555
Analysis of deuteron NMR spectrum in propanediol for polarization measurement, O. HAMADA, S. HIRAMATSU, S. ISAGAWA, S. ISHIMOTO, A. MASAIKE and K. MORIMOTO **189** (1981) 561
The breakdown voltage of silicon dioxide breakdown detectors for fission fragments, N. KLEIN **189** (1981) 569
Scanning electron microscope analysis of etch pits obtained in a Muscovite mica track detector by etching in hydrofluoric acid and aqueous solutions of NaOH and KOH, H.A. KHAN, N.A. KHAN and R. SPOHR **189** (1981) 577
Dependence of etch pit cone angles in glass track detectors on the energy and charge of the particles, H.A. KHAN, N.A. KHAN and R. SPOHR **189** (1981) 583
The use of laser doped Li contacts on semiconductor nuclear radiation detectors, S.J. PEARTON **189** (1981) 589
Calculation of thorium and uranium X-ray intensities in thick ore sample PIXE analysis (*Letter to the Editor*), R.P.H. GARTEN, K.-O. GROENEVELD and K.-H. KÖNING **189** (1981) 641
Measurement of natural radioactivity in construction materials with silicon detectors (*Letter to the Editor*), M. WÓJCIK **189** (1981) 645
Determination of atomic masses via (n_{th}, p) and (n_{th}, α) reactions, C. WAGEMANS, E. ALLAERT, G. BARREAU, A. EMSALLEM and P. D'HONDT **190** (1981) 167
Automatic beam alignment for channeling measurements in Rutherford backscattering spectrometry, Y. YAMAMOTO **190** (1981) 171
Application of Si(Li) detector response function for the analysis of a tungsten library standard, L. WIELOPOLSKI . **190** (1981) 177
Radioactive sources for Si(Li)–Ge(Li) coincidence circuit adjustment (*Letter to the Editor*), A PAPE and J.C. SENS **190** (1981) 209
A multiple mirror system for polarization of thermal neutrons (*Letter to the Editor*), K. DÖRR, H. ACKERMANN, B. BADER, H.-J. STÖCKMANN and P. v. BLANCKENHAGEN **190** (1981) 211
Angular dependence of the detection limit of PIXE, T.C. CHU, K. ISHII, A. YAMADERA, M. SEBATA and S. MORITA **190** (1981) 395
Desorption of carbon from tungsten by argon ion bombardment, J.L. PEÑA, J.W. DIEBALL and D. LICHTMAN . . **190** (1981) 401
The angular sensitivity of Kodak LR-film to alpha particles, G. JÖNSSON **190** (1981) 407
Effect of various etching solutions on the response of CR-39 plastic track detector, S.A. AMIN and D.L. HENSHAW **190** (1981) 415
Development of the moments method for neutron gauging, D. INGMAN and E. TAVIV **190** (1981) 423
Conversion electron Mössbauer spectroscopy with the use of channel electron multipliers operating at low temperatures (*Letter to the Editor*), J.A. SAWICKI, T. TYLISZCZAK and O. GZOWSKI **190** (1981) 433
A deconvolution technique for depth profiling with nuclear microanalysis, M.B. LEWIS **190** (1981) 605

Atomic and Molecular Beam Studies

Dependence of energy straggling on energy loss as a first order correction, J.P. Stoquert, A. Amokrane, H. Beaumevieille and J.C. Oberlin . . . **185** (1981) 513
Stopping power values of C, Al, Si, Ni, Ag and Au for ^{3}He ions, D.C. Santry and R.D. Werner . . . **185** (1981) 517
Ion induced electron emission from polycrystalline copper, G. Holmén, B. Svensson and A. Burén . . . **185** (1981) 523
Angular distribution measurements of sputtered Au atoms with quartz oscillator microbalances, M. Mannami, K. Kimura and A. Kyoshima . . . **185** (1981) 533
The use of H_2^+ and H_3^+ molecular ions as bombarding particles (*Letter to the Editor*), A. Anttila and J. Räisänen . . . **185** (1981) 601
K-shell ionizatoin by heavy ions, T. Mukoyama and L. Sarkadi . . . **186** (1981) 641
Higher order Z_1 effects in heavy ion stopping powers and ranges, J.M. Anthony and W.A. Lanford . . . **186** (1981) 647
A triply focusing magnet for electron spectrometry (*Letter to the Editor*), M. Komma and H. Ruoff . . . **186** (1981) 669
Heavy particle detection characteristics of an MWPC operating at low ($1 \leqslant p \leqslant 30$ mbar) gas pressure, G. Möller, G. Presser and J. Stähler . . . **187** (1981) 605
Multiple event 2D image intensifier scintillation detector, P. Thieberger, H.W. Wegner and R.C. Lee . . . **187** (1981) 611
Monte Carlo simulation of the interaction of energetic ions passing through gas filled systems, J. Zienert, K. Güttner and G. Münzenberg . . . **187** (1981) 615
Yield of secondary electrons emitted by heavy ions passing through carbon foils, H.P. Garnir, P.D. Dumont and Y. Baudinet-Robinet . . . **187** (1981) 625
Electron capture from silicon and germanium foils by protons, Ghau-chin Wei, Wu-hshiung Hsu and Bohsheng Harn . . . **187** (1981) 629
Stopping powers of C, Al, Si, Ti, Ni, Ag and Au for deuterons, D.C. Santry and R.D. Werner . . . **188** (1981) 211
Deposited energy losses of high energy ions in thin gas layers, K. Nagata, J. Kikuchi, T. Doke and C.R. Gruhn . . . **188** (1981) 217
X-ray yields by low energy heavy ion excitation in alkali halide solid targets, M.B. Kurup, K.G. Prasad and R.P. Sharma . . . **188** (1981) 223
Some characteristics of an electron beam ion source, H. Imamura, Y. Kaneko, T. Iwai, S. Ohtani, K. Okuno, N. Kobayashi, S. Tsurubuchi, M. Kimura and H. Tawara . . . **188** (1981) 233
Imprisonment of resonance scattered radiation in the process of alkali atom optical pumping and polarized alkali ion sources, A.S. Belov and B.E. Stern . . . **188** (1981) 453
Stopping of D relative to H in carbon, 50–150 keV per nucleon (*Letter to the Editor*), G. Astner, S. Mannervik and E. Veje . . . **188** (1981) 475
A simple ultrasoft X-ray calibration source (*Letter to the Editor*), A.W. Kolfschoten, H.W. van der Ven and A. Buijs . . . **188** (1981) 477
Stopping power of solid argon for helium ions. F. Besenbacher, J. Bøttiger, O. Graversen, J.L. Hansen and H. Sørensen . . . **188** (1981) 657
Depolarization effects in optically pumped polarized proton sources, E.A. Hinds, W.D. Cornelius and R.L. York . . . **189** (1981) 599
Experimental set-up for the masurement of ionization probabilities with a low pressure multiwire proportional chamber, J. Stähler and G. Presser . . . **189** (1981) 603
Planar dechanneling of GeV particles in a bent crystal, H. Kudo . . . **189** (1981) 609
Simple method for yield measurements of secondary ions desorbed by fast heavy ions of variable energy, P. Dück, H. Fröhlich, W. Treu and H. Voit . . . **189** (1981) 615
Multiple scattering – a different approach for any cross section and any scatterer thickness, J.E. Draper . . . **190** (1981) 181
Equilibrium charge-state distributions of highly stripped ions in carbon foils, Y. Baudinet-Robinet . . . **190** (1981) 197
Mass-spectrometric study of the negatively-charged krypton monofluoride (*Letter to the Editor*), E. Minehara and S. Abe . . . **190** (1981) 215
Production of polarization ions by electron transfer from polarizated atoms, (*Letter to the Editor*), W. Haeberli **190** (1981) 437
A point focusing graphite spectrometer for low energy X-rays, E. Bovet, F. Boehm, J. Gimlett, H.E. Henrikson, R. Kunselmann, P.L. Lee and J. Markey . . . **190** (1981) 613
L-shell ionization by low-energy protons and alpha particles, T. Mukoyama and L. Sarkadi . . . **190** (1981) 619

Special Applications

Design of a nuclear clock, A. Notea . . . **185** (1981) 539
An MWPC with a cathode coupled delay line read-out as radioactivity detector for DNA repair studies, R. Bellazzini, A. del Guerra, M.M. Massai, M. Ragadini, G. Spandre and G. Tonelli . . . **190** (1981) 627

Letters to the Editor

Beam emittance measurements of magnetron type negative ion source, Y. WAKUTA, K. MATSUO and A. NAGAO . **184** (1981) 583
Circular hole iron septum magnet, H. NOMA, T. SHIODA and Y. YOSHIZAWA . **184** (1981) 587
The use of a single optical attenuator for sub-nanosecond walk calibrations of constant fraction discriminators, P.N. GIBSON, C.F.G. DELANEY, G.E. NOLAN and E.C. FINCH . **184** (1981) 591
The calibration of neutron detectors with spherical moderators, K.G. HARRISON . **184** (1981) 595
Comparison of the efficiency values of HgI_2 and NaI detectors, R. RIEPPO . **184** (1981) 599
Humidity measurements using a double ionization chamber with γ-rays, S. MATSUMOTO and H. KOBAYASHI . **184** (1981) 603
New method for the production of polarized ^{3}He ions based on the $2S_1$ state of ^{3}He, R.J. SLOBODRIAN . **185** (1981) 581
On the cleaning of heavy-ion source anodes, R.C. ROGERS . **185** (1981) 585
The effect of wavelength shifters on water Cherenkov detectors, G. BADINO, P. GALEOTTI, L. PERIALE, O. SAAVEDRA and A. TURTELLI . **185** (1981) 587
Noise in resistive charge-division position-sensing methods, J.C. VERMEULEN . **185** (1981) 591
Subdivision of a graded-density cathode, P.J. GILVIN, E. MATHIESON and G.C. SMITH . **185** (1981) 595
Depth selective conversion electron Mössbauer spectroscopy: Comparison of experiment with Monte Carlo simulation of electron scattering, D. LILJEQUIST . **185** (1981) 599
The use of H_2^+ and H_3^+ molecular ions as bombarding particles, A. ANTTILA and J. RÄISÄNEN . **185** (1981) 601
Production of intense beams of polarized negative hydrogen ions by the atomic beam method, P.A. SCHMELZBACH, W. GRÜEBLER, V. KÖNIG and B. JENNY . **186** (1981) 655
Evaluation of thin metal foils as targets and windows for heavy-ion experiments, J.D. MOLITORIS and J.M. NITSCHKE . **186** (1981) 659
A remote device for de-encapsulating reactor-irradiated samples, G.P. SCHWAIGER and R.W. FINK . **186** (1981) 663
Energy calibration of organic scitillation detectors for gamma rays, R. DIEHL and U. GRASER . **186** (1981) 665
A triply focusing magnet for electron spectrometry, M. KOMMA and H. RUOFF . **186** (1981) 669
A double mini-orange spectrometer, R.V.F. JANSSENS, J.F.W. JANSEN, J. VAN KLINKEN, S.P. STEENDAM, J. LUKASIAK, W.Z. VENEMA and W.E.M.P.E. WEMPE . **187** (1981) 635
Measurement of threshold for the long-period activity in the reaction ^{39}K(α, n)^{38}K, N.M. CHAUDRI . **187** (1981) 639
Cross contamination of masses in surface ionization integrated target-ion-sources for on-line isotope separators, G. ENGLER, M.S. RAPAPORT, I. YORESH and E. SKURNIK . **187** (1981) 643
Gamma spectroscopy system for high count rates, P. MARANESI . **187** (1981) 645
Experimental evaluation of fission spectrum averaged cross sections of ^{93}Nb(n, n′)^{93m}nb and ^{199}Hg(n, n′)^{199m}Hg reactions, K. SAKURAI and I. KONDO . **187** (1981) 649

atomic energy level & grotrian diagrams

by **STANLEY BASHKIN and JOHN O. STONER JR.,** Department of Physics, University of Arizona, Tucson, Arizona, U.S.A.

Volume 4 continues this indispensable reference series in which pictorial representations are given for the energy levels and electronic transitions for all stages of ionization for the elements reviewed. The source material is the world's spectroscopic literature, buttressed by private communications from many of the principal workers in spectroscopy. The diagrams give the quantum descriptions of the levels as well as the other information, the emphasis being on laboratory observations. In addition to the diagrams, a complete bibliography is provided.

The series will be invaluable to all scientists and teachers of science who are concerned with atoms and monatomic ions. As it is possible to see not only what is known about such systems, but also what remains to be found, research workers too will find the books useful guides to problems in atomic structure.

Volume IV

Manganese 1 - XXV
1982 xiv + 354 pages
Price: US $72.75/Dfl. 170.00
ISBN 0-444-86463-6

The format of this final volume closely follows that of the previously published volumes. Specific references to the authors consulted in the preparation of this volume are listed in the bibliography section

Volume III

Vanadium I - Chromium XXIV
1981 xvi + 550 pages
Price: US $106.50/Dfl. 250.00
ISBN 0-444-86006-1

To a greater extent than in previous volumes the authors have included calculated values of energies and/or wavelengths in order to provide the reader with at least fragmentary information for each spectrum

Volume II

Sulphus I - Titanium XXII
1978 xviii + 650 pages
Price: US $106.50/Dfl. 250.00
ISBN 0-444-85149-6

This volume includes all monatomic species from Sulfur I through Titanium XXII. The data are the most complete to be found in a single volume and the main contents of each reference are briefly described

"This book, together with Volume I and its addendum volume appears to be the most comprehensive collection of atomic energy level diagrams since the introduction of graphical representation of atomic levels by Grotrian more than fifty years ago."

Astrophysical Letters

Volume I

Hydrogen I - Phosphorus XV
1976 xx + 616 pages
Price: US $250.00/Dfl. 106.50
ISBN 0-7204-0322-7

"For each element a short bibliography is included, giving the source material used for each spectrum. Six general references cover most of the data. The excellent table of contents is invaluable."

Journal of the Optical Society of America

Volume I Addenda

1978 viii + 178 pages
Price: US $36.25/Dfl. 85.00
ISBN 0-444-85236-0

In extending and correcting the information presented in Volume I, the editors have in several cases constructed new diagrams in light of the extensive revisions to spectroscopic data that became available between the publication of Volume 1 and June 1976

Subscription Scheme

Subscribers to the series ATOMIC ENERGY LEVELS AND GROTRIAN DIAGRAMS are entitled to a 15% discount on the list price per volume

ENRICO FERMI INTERNATIONAL SUMMER SCHOOL OF PHYSICS, Volume 79

From Nuclei to Particles

Proceedings of the International School of Physics, "Enrico Fermi", Course LXXIX, Varenna, Italy, 23 June - 5 July, 1980

edited by A. MOLINARI, *Institute of Physics, University of Turin, Italy*

1982 xii + 536 pages Price: US $106.50/Dfl. 250.00 ISBN 0-444-86158-0
Subscription price: US $90.50/Dfl. 212.50

This work focusses on the role played by "elementary particles" inside nuclear structure, a subject both important and fruitful in its own right, but concentrates more on ideas of learning, comparing, and, whenever possible, deepening the concepts and the methods of both fields on themes obviously selected, but commonly recognized as being of central interest and great actuality.

It was felt that this rather unorthodox procedure was worthy of pursuit on three accounts: a) for the student, by providing for their cultural background a broader foundation, more easily achieved by beginners; b) for lecturers, to whom it has offered an oppurtunity to confront ideas, extend their knowledge and perhaps to recognise that the problems confronting them in their own fields share a spectrum of themes wider than expected with the neighbouring ones; and c) for physics, since it offers an occasion for scientists of different areas to meet each other thus promoting the conditions for a renewal of approaches and ideas. Throughout this book, the Nature in the domain of dimensions as small as 10^{-13} is explored.

CONTENTS: Preface *(A. Molinari).* Brueckner-Bethe Calculations of Nuclear Matter *(B. D. Day).* FHNC Variational Theory for Strongly Interacting Fermi Systems *(S. Rosati).* Hartree-Fock Mean-Field Theories in Finite Nuclei *(D. M. Brink).* Sum Rule Approach to the Nuclear Collective Motion *(R. Leonardi).* Simple Models of Complex Nuclei *(I. Talmi).* Hadron-Nucleus Interactions *(H. Feshbach).* Pion Condensation and Critical Effects *(T. E. O. Ericson).* Quantum Chromodynamics *(G. Veneziano).* Spontaneous Breaking of Symmetries *(S. Fubini).* Unified Gravity Theories *(T. Regge).* Momentum Distributions in Quantum Fluids and Nuclear Matter *(M. L. Ristig).* Single-Particle Response of Finite Nuclei *(S. Boffi).* Spin-Isospin Phases in Nuclear Matter and in Nuclei *(F. Palumbo).* Self-Consistent Theory of Hadron-Nucleus Scattering. Application to Pion Physics *(M. B. Johnson).* Precursor Phenomena of Pion Condensation *(M. Ericson).* Photon Scattering by Plane Polarized Photons *(R. G. Leicht and B. Ziegler).* Monochromatic Photon Scattering Experiment *(R. G. Leicht et al.).* The LEAR Project and Physics with Low-Energy Antiprotons *(U. Gastaldi and R. Klapisch).* Δ and π Propagation in Infinite Nuclear Matter *(R. Cenni).* The Shell Model Potential from a Relavistic Hartree-Fock Approach *(M. Jaminon, C. Mahaux and P. Rochus).* Symmetry Energy and The Dipole Excitation Strength *(S. Stringari and E. Lipparini).*

PHYSICS REPORTS

A REVIEW SECTION OF PHYSICS LETTERS

Over the years PHYSICS REPORTS has built up an international reputation as one of the leading review journals for diverse branches of physics, viz. The physics of elementary particles and fields; Nuclear physics; Atomic and molecular physics; Condensed matter, both structure, thermal and mechanical properties as well as electronic structure, electrical, magnetic and optical properties. To date some 400 review articles have been published.

PHYSICS REPORTS offers a substantial discount to INDIVIDUALS ONLY, so that research workers and/or graduate students will be in a position to afford their own copy of a particular Report.

A special brochure, containing all PHYSICS REPORTS (80 volumes) published to date, is available free of charge from the publisher.

In order to give you an impression of the nature of this review programme, the 1981 bestsellers are listed below.

PHYSICS REPORTS 1981 TOP 10

1. GAUGE THEORIES, by E. S. Abers and B. W. Lee. Volume 9, no. 1
2. QUANTUM CHROMODYNAMICS, by W. Marciana and H. Pagels. Volume 36, no. 3
3. NON-PERTURBATIVE ASPECTS IN QUANTUM FIELD THEORY, by E. Brézin and J. L. Gervais. Volume 49, no. 2
4. SUPERSYMMETRY, by P. Fayet and S. Ferrara. Volume 32, no. 5
5. THE RENORMALIZATION GROUP AND THE ε EXPANSION, by K. G. Wilson and I. Kogut. Volume 12, no. 2
6. LATTICE GAUGE FIELDS, by J. M. Drouffe and C. Itzykson. Volume 38, no. 3
7. PATH INTEGRALS IN QUANTUM THEORY: AN OUTLOOK OF BASIC CONCEPTS, by M. S. Marinov. Volume 60, no. 1
8. QUANTUM THEORY OF SOLITONS, by L. D. Faddeev and V. E. Korepin. Volume 42, no. 1
9. EXTENDED SYSTEMS IN FIELD THEORY (Proc. of the Meeting held at Ecole Normal Supérieure, Paris, June 16-21, 1975), edited by J. L. Gervais and A. Neveu. Volume 23, no. 3
10. GRAVITATION, GAUGE THEORIES AND DIFFERENTIAL GEOMETRY, by T. Eguchi, P. Gilkey and A. J. Hanson. Volume 66, no. 6
